Ölçer, Momoko Kitada, Dimitrios Dalaklis, Fabio Ballini, 2018-05-03 This book provides an overview of contemporary trends and challenges in maritime energy management MEM Coordinated action is necessary to achieve a low carbon and energy efficient maritime future and MEM is the prevailing framework aimed at reducing greenhouse gas emissions resulting from maritime industry activities The book familiarizes readers with the status quo in the field and paves the way for finding solutions to perceived challenges The 34 contributions cover six important aspects regulatory framework energy efficient ship design energy efficient ship and port operation economic and social dimensions alternative fuels and wind assisted ship propulsion and marine renewable energy This pioneering work is intended for researchers and academics as well as practitioners and policymakers involved in this important field

**Advances in Human Aspects of Transportation: Part I** Neville Stanton, Giuseppe Di Bucchianico, Andrea Vallicelli, Steven Landry, 2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system

**Concrete Solutions** Michael Grantham, 2016-09-19 Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions the 6th International Conference on Concrete Repair Thessaloniki Greece 20-23 June 2016 Strengthening and retrofitting are major themes in this volume with NDT and electrochemical repair following closely discussing the latest advances and technologies in concrete repair The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly Concrete Solutions is an

essential reference work for those working in the concrete repair field from engineers to architects and from students to clients The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St Malo France in association with INSA Rennes Subsequent conferences have seen the Series partnering with the University of Padua Italy in 2009 with TU Dresden Germany in 2011 and with Queen s University Belfast Northern Ireland in 2014 In 2016 Thessaloniki Greece hosted the conference partnering with both Aristotle University of Thessaloniki AUTH and Democritus University of Thrace DUTH The next conference in the series will be held in 2019 in Istanbul *Kama Muta* Alan Page Fiske, 2019-11-26 This book describes a ubiquitous and potent emotion that has only rarely and recently been studied in any systematic manner The words that come closest to denoting it in English are being moved or touched having a heart warming feeling feeling nostalgic feeling patriotic or pride in family or team In religious contexts when the emotion is intense it may be labeled ecstasy mystical rapture burning in the bosom or being touched by the Spirit All of these are instances of what scientists now call kama muta Sanskrit moved by love Alan Page Fiske shows that what evokes this emotion is the sudden creation intensification renewal repair or recall of a communal sharing relationship when love ignites or people feel newly connected He explains the social psychological cultural and likely evolutionary processes involved and how they interlock Kama muta is described as it manifests in diverse settings at many points in history across scores of cultures in everyday experiences as well as the peak moments of life The chapters illuminate the occurrence of kama muta in a range of contexts including religion oratory literature sport social media and nature The book will be of interest to students and scholars from a number of disciplines who are interested in emotion or social relationships Supplementary notes can be found online at [www.routledge.com/9780367220945](http://www.routledge.com/9780367220945) **Scientific and Technical Aerospace Reports**, 1991 *Men, Masculinities and Disaster* Elaine Enarson, Bob Pease, 2016-06-17 In the examination of gender as a driving force in disasters too little attention has been paid to how women s or men s disaster experiences relate to the wider context of gender inequality or how gender just practice can help prevent disasters or address climate change at a structural level With a foreword from Kenneth Hewitt an afterword from Raewyn Connell and contributions from renowned international experts this book helps address the gap It explores disasters in diverse environmental hazard political and cultural contexts through original research and theoretical reflection building on the under utilized orientation of critical men s studies This body of thought not previously applied in disaster contexts explores how men gain maintain and use power to assert control over women Contributing authors examine the gender terrain of disasters through men s eyes considering how diverse forms of masculinities shape men s efforts to respond to and recover from disasters and other climate challenges The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men It concludes by examining how disaster risk can be reduced through men s diverse efforts to challenge hierarchies around gender sexuality disability age and culture *Guidelines for Mine Waste Dump and Stockpile Design*

Mark Hawley, 2017-04 Guidelines for Mine Waste Dump and Stockpile Design is a comprehensive practical guide to the investigation design operation and monitoring of mine waste dumps dragline spoils and major stockpiles associated with large open pit mines. These facilities are some of the largest man made structures on Earth and while most have performed very well there are cases where instabilities have occurred with severe consequences including loss of life and extensive environmental and economic damage. Developed and written by industry experts with extensive knowledge and experience this book is an initiative of the Large Open Pit LOP Project. It comprises 16 chapters that follow the life cycle of a mine waste dump dragline spoil or stockpile from site selection to closure and reclamation. It describes the investigation and design process, introduces a comprehensive stability rating and hazard classification system, provides guidance on acceptability criteria and sets out the key elements of stability and runout analysis. Chapters on site and material characterisation, surface water and groundwater characterisation and management, risk assessment, operations and monitoring, management of ARD, emerging technologies and closure are included. A chapter is also dedicated to the analysis and design of dragline spoils. Guidelines for Mine Waste Dump and Stockpile Design summarises the current state of practice and provides insight and guidance to mine operators, geotechnical engineers, mining engineers, hydrogeologists, geologists and other individuals that are responsible at the mine site level for ensuring the stability and performance of these structures. Readership includes mining engineers, geotechnical engineers, civil engineers, engineering geologists, hydrogeologists, environmental scientists and other professionals involved in the site selection, investigation, design, permitting, construction, operation, monitoring, closure and reclamation of mine waste dumps and stockpiles.

Chemical Biology Editor's Pick 2024 John D. Wade, 2024-12-06 We are pleased to introduce the collection Frontiers in Chemistry Chemical Biology Editor's Pick 2024. This collection showcases the most well received spontaneous articles from the past couple of years and have been specially handpicked by our Chief Editors. The work presented here highlights the broad diversity of research performed across the section and aims to put a spotlight on the main areas of interest. All research presented here displays strong advances in theory, experiment and methodology with applications to compelling problems.

**Nature-based Solutions for Resilient Ecosystems and Societies** Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07 Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia. These disasters lead to substantial loss of life, livelihoods and community assets which not only threatens the pace of socio-economic development but also undo hard earned gains. Extreme events and disasters such as floods, droughts, heat, fire, cyclones and tidal surges are known to be exacerbated by environmental changes including climate change, land use changes and natural resource degradation. Increasing climate variability and multi-dimensional vulnerabilities have severely affected the social, ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt. Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities severely impact the ecosystems and Nature's

Contributions to People NCP and thereby to human well being Long term resilience building through disaster risk reduction and integrated adaptive climate planning therefore has become a key priority for scientists and policymakers alike Nature based Solutions NbS is a cost effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change adaptation while also providing a range of co benefits like sustainable livelihoods and food water and energy security This book discusses the concept of Nature based Solutions NbS both as a science and as art and elaborates on how it can be applied to develop healthy and resilient ecosystems locally nationally regionally and globally The book covers illustrative methods and tools adopted for applying NbS in different countries The authors discuss NbS applications and challenges research trends and future insights that have wider regional and global relevance The aspects covered include landscape restoration ecosystem based adaptation ecosystem based disaster risk reduction ecological restoration ecosystem based protected areas management green infrastructure development nature friendly infrastructure development in various ecosystem types agro climatic zones and watersheds The book offers insights into understanding the sustainable development goals SDGs at the grass roots level and can help indigenous and local communities harness ecosystem services to help achieve them It offers a unique essential resource for researchers students corporations administrators and policymakers working in the fields of the environment geography development policy planning the natural sciences life sciences agriculture health climate change and disaster studies
