

Wechsler Intelligence Scale for Children—Fourth Edition (WISC-IV)

Harcourt Assessment/The Psychological Corporation (2003)

Reviewed by Stefan C. Dombrowski & Kelly Noonan

Age range: 6 year 0 months through 16 years 11 months (6:0-16:11)

Cost: \$775 Soft or Hard Case with complete kit; \$725 Box with complete kit
\$165 Scoring Assistant; \$350 Report Writer

Many new or newly revised intelligence tests are now available, and school districts may be in the midst of holding workshops about them or deciding which of these tests will become part of their assessment repertoire. Since their development, the Wechsler scales have been a major force in intelligence testing. The WISC-IV, with its linkage to the Wechsler tradition and research base, will doubtless be given serious consideration. The following review of the WISC-IV will familiarize psychologists with the psychometric, theoretical and administrative nuances of the WISC-IV.

Description

Scales and indices. The WISC-IV, like its predecessor, the Wechsler Intelligence Scales for Children, 3rd Edition (WISC-III) (1991), provides a measure of general intellectual functioning (Full Scale IQ [FSIQ]). The WISC-IV four-index framework (Verbal Comprehension, Perceptual Reasoning, Working Memory and Processing Speed) is similar to that of the WISC-III. However, there have been changes to both the title and content of some of the index areas. For instance, the manual reports that the WISC-III Perceptual Organization Index was renamed Perceptual Reasoning Index (PRI) to reflect increased emphasis on fluid reasoning abilities. Similarly, the WISC-III Freedom from Distractibility Index was renamed Working Memory Index (WMI) to more appropriately reflect the theoretical structure of that index. The titles, Verbal Comprehension Index (VCI) and Processing Speed Index (PSI), have been retained by the WISC-IV, although some of the subtests that contribute to the VCI have been deleted — the WISC-IV VCI now includes only Similarities, Vocabulary and Comprehension.

The Verbal-Performance dichotomy used in the WISC-III has been eliminated, but limited discussion was provided in the manual regarding the reasons for this change. *The Technical and Interpretive Manual* claims that the WISC-IV Verbal Comprehension Index and the Perceptual Reasoning Index may be used in the same way that the WISC-III Verbal IQ and Performance IQ were used in clinical decision-making. One may wonder, however, what sort of clinical decision-making the tests authors are referring to in this case? Are they referring to the use of either of the scales for making learning disabilities eligibility decisions? The manual is unclear on this important issue.

Subtests. The WISC-IV has ten core subtests and five supplemental subtests, which are presented below according to the order of their administration. Supplemental subtests may be substituted for specific core subtests when one of the core subtests is spoiled.

Core Subtests	Supplemental Subtests
Block Design	Picture Completion
Similarities	Cancellation
Digit Span	Information
Picture Concepts	Arithmetic
Coding	Word Reasoning
Vocabulary	
Letter-Number Sequencing	
Matrix Reasoning	
Comprehension	
Symbol Search
