Wednesday's Child Gregory P. Schulz, 2011-01-01 Philosophy of emotion is a vital topic within contemporary philosophy of mind Beginning from insights latent in Heidegger's early philosophy *Wednesday's Child* is an argument that with the recognition of a suitable field of consciousness it ought to be possible to speak scientifically about our non-cognitive and non-volitional but nevertheless rational moods in particular that most celebrated mood namely Angst With the emergence of twentieth century existentialism and its attention to human experience and with Heidegger's revolutionary insight that an emotional mood such as Angst long-term anxiety or anguish has intentionality the time was ripe for serious phenomenological work on the emotional aspect of our human being Much more recently advances in neurological imaging have enabled us to contemplate the phenomenon of human emotion scientifically At present the new discipline of social neuroscience affords us a philosophical and scientific opportunity to attend to the emotional aspect of our being a long neglected aspect of our humanity Proceeding from Heidegger's insight regarding the intentionality of moods this book adumbrates a type of social neuroscience capable of validating Heidegger's understanding of the centrality of Angst for human being *Wednesday's Child* concludes with an Afterthought pointing to the religious and non-religious uses of Angst which the author depicts as a prime datum of our human being and includes a glossary and an appended outline of the book's argument

Begetting Mara van der Lugt, 2024-04-30 An investigation of what it means to have children morally philosophically and emotionally Do you want to have children is a question we routinely ask each other But what does it mean to create a child Is this decision always justified Does anyone really have the moral right to create another person In *Begetting* Mara van der Lugt attempts to fill in the moral background of procreation Drawing on both philosophy and popular culture van der Lugt does not provide a definitive answer on the morality of having a child instead she helps us find the right questions to ask Most of the time when we talk about whether to have children what we are really talking about is whether we want to have children Van der Lugt shows why this is not enough To consider having children she argues is to interrogate our own responsibility and commitments morally and philosophically and also personally What does it mean to bring a new creature into the world to decide to perform an act of creation What does it mean to make the decision that life is worth living on behalf of a person who cannot be consulted These questions are part of a conversation we should have started long ago Van der Lugt does not ignore the problematic aspects of procreation ethical environmental and otherwise But she also acknowledges the depth and complexity of the intensely human desire to have a child of our own blood and our own making
