Forensic Laboratory Management W. Mark Dale,Wendy S. Becker,2014-09-26

New technologies including DNA and digital databases that can compare known and questioned exemplars have transformed forensic science and greatly impacted the investigative process. They have also made the work more complicated. Obtaining proper resources to provide quality and timely forensic services is frequently a challenge for forensic managers who are often promoted from casework duties and must now learn a whole new set of leadership skills. The interdisciplinary and scientific nature of laboratories requires strong leadership ability to manage complex issues often in adversarial settings.

Forensic Laboratory Management Applying Business Principles provides laboratory managers with business tools that apply the best science to the best evidence in a manner that increases the efficiency and effectiveness of their management decision making. The authors present a performance model with seven recommendations to implement illustrating how forensic managers can serve as leaders and strategically improve the operation and management in scientific laboratories. Topics include Key business metrics and cost benefit analyses, Ethical lapses why they occur possible motives and how problems can be prevented, Forensic training education and institutes, ISO IEC 17025 accreditation implementation. The book includes case studies simulating a working laboratory in which readers can apply business tools with actual data reinforcing discussion concepts. Each chapter also includes a brief review of current literature of the best management theories and practice. The downloadable resources supply two mock trial transcripts and associated case files along with PowerPoint slides from Dr George Carmody's workshop on Forensic DNA Statistics and Dr Doug Lucas's presentation on ethics.

Online Education During COVID-19 and Beyond Silvia Puiu, Samuel O. Idowu, 2024-04-10. This book aims to provide sustainable solutions for better understanding and management of online education in different parts of the world. In this context it explores the attitudes and perceptions of stakeholders such as students, faculty and other actors on issues related to online education. In particular it examines the challenges they have faced over the years when online courses were introduced due to the COVID 19 pandemic. A model is proposed that includes five variables: specific communication issues in online education, the ability of professors to offer online courses, the quality of online education, students' perceived stress during online education and the technical requirements of online education. The book will be of interest to anyone concerned with the new and future ways of teaching and learning.
