Rosina K. Foli, 2023-03-09 This book examines the roles played by transnational actors to influence poverty reduction policies in Ghana Whereas previous studies on anti poverty policies have primarily focused on the carrot and stick approach deployed by transnational actors whereby developmental assistance is granted in return of certain conditions being met this book demonstrates that there are several alternative strategies Indeed rather than adopting hard means of shaping policy many transnational actors in fact use a soft approach characterized by collaboration In order to demonstrate this the

Productive Multivocality in the Analysis of Group

Interactions Daniel D. Suthers, Kristine Lund, Carolyn Penstein Rosé, Chris Teplovs, Nancy Law, 2013-12-02 The key idea of the book is that scientific and practical advances can be obtained if researchers working in traditions that have been assumed to be mutually incompatible make a real effort to engage in dialogue with each other comparing and contrasting their understandings of a given phenomenon and how these different understandings can either complement or mutually elaborate on each other This key idea applies to many fields particularly in the social and behavioral sciences as well as education and computer science The book shows how we have achieved this by presenting our study of collaborative learning during the course of a four year project Through a series of five workshops involving dozens of researchers the 37 editors and authors involved in this project studied and reported on collaborative learning technology enhanced learning and cooperative work The authors share an interest in understanding group interactions but approach this topic from a variety of traditional disciplinary homes and theoretical and methodological traditions This allows the book to be of use to researchers in many different fields and with many different goals and agendas
