Juarez, 2024-11-11 This manual provides students in academic laboratory courses with hands on experience in the major processes of forensic anthropology. For the fifth edition the manual has been updated in line with the textbook incorporating new methods figures and worksheets. Each chapter contains explanations of the terminology, osteological features and measurements needed to understand each of the topics. New for this edition in many chapters students will find the incorporation of QR codes to give them immediate access to relevant video or website content to assist with the task at hand.
