Transport Revolutions Richard Gilbert,Anthony Perl,2018-10-24 First released in 2007 the bestselling Transport Revolutions argued that land transport in the first half of the 21st century will feature at least two revolutions One will involve the use of electric drives rather than internal combustion engines Another will involve powering many of these drives directly from the electric grid as trains and trolley buses are powered today rather than from on board fuel Now available for the first time in paperback and updated with the most recent data it sets out the challenges to our growing dependence on transport fuelled by low priced oil These challenges include an early peak in world oil production and profound climate

change resulting in part from oil use It proposes responses to ensure effective secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts Synthesizing engineering economics environment organization policy and technology in a detailed yet highly readable style Transport Revolutions is essential reading for anyone working studying or interested in transport and the environment The Canada Gazette Canada,1902 *Canadian Railway and Marine World* ,1925 **Letter to the Secretary of State, Canada** Canada.
