Globalization or Regionalization of the American and Asian Car Industry? M. Freyssenet, K. Shimizu, G.

Volpato, 2003-04-15 The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade. This book looks specifically at the American and Asian car industry.

Wikipedia contributors, **The Automotive Industry and European Integration** A. J. Jacobs, 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Vauxhall Ian Coomber, 2017-11-07 The untold story of Britain's oldest car maker. Many previously unpublished images from the vaults of Vauxhall. A view from the inside that has been untold until now. Of interest to the motorcar historian and modellers. Vauxhall has been making cars in Britain for longer than anyone else. The first Vauxhall car left a cramped Thames side works in 1903. Moving to Luton in 1905, Vauxhall became famous as a maker of sporting and luxury cars. Bought by the American giant General Motors, the company entered the era of mass production and, with the addition of Bedford trucks and vans, became one of the top five UK producers. After the Second World War, Vauxhall became the household name it is today, with models such as Viva, Astra, Cresta, Victor, Nova, Cavalier and Vivaro. The journey from the Thames to today's plants at Ellesmere Port and Luton is full of twists, turns, dramas and triumphs and continues with the announcement of the sale of General Motors European operations to the PSA Groupe. The author worked at Vauxhall for 38 years, from apprentice to boardroom. He has told the Vauxhall story with the benefit of years of experience and a lifelong passion for the marque.
