

Condition outside:

2. Fertilised Egg → when the sperm is joining to the  
Egg of oviduct. This is supposed to be the same  
process as joining the same female. Because of  
this the sperm can take place through genetic fluid.  
which would be controlled by each other's body.  
Joining the two makes them into a single unit.

In the case absorption of cell is responsible  
for some time and growth making it human.  
This process is called 'Osmosis'.

3. Sometimes, the sperm is joining to the egg of  
oviduct. This can form cells and another and develop  
as a single egg. This condition is called 'Polyspermy'  
Division.

3. Sometimes, after the death of cell, cells of fertilised  
egg remain inside the oviduct. They would be  
absorbed by oviduct body. Usually joining to more  
than one sperm makes for the oviduct.

4. Sometimes, mutation can take place in the egg.  
This which can result in more than one egg  
being produced. Genetic making of cell may not  
be able to form single egg. This process is  
supposed to be 'Mutation'.

*Security, Privacy and Trust in the IoT Environment* Zaigham Mahmood, 2019-05-30 The Internet of Things (IoT) is a network of devices and smart things that provides a pervasive environment in which people can interact with both the cyber and physical worlds. As the number and variety of connected objects continue to grow and the devices themselves become smarter, users' expectations in terms of adaptive and self governing digital environments are also on the rise. Although this connectivity and the resultant smarter living is highly attractive to general public and profitable for the industry, there are also inherent concerns. The most challenging of these refer to the privacy and security of data, user trust of the digital systems and relevant authentication mechanisms. These aspects call for novel network architectures and middleware platforms based on new communication technologies as well as the adoption of novel context aware management approaches and more efficient tools and devices. In this context, this book explores central issues of privacy, security and trust with regard to the IoT environments as well as technical solutions to help address them. The main topics covered include: Basic concepts, principles and related technologies; Security, privacy of data and trust issues; Mechanisms for security, privacy, trust and authentication; Success indicators, performance metrics and future directions. This reference text is aimed at supporting a number of potential audiences including Network Specialists, Hardware Engineers and Security Experts, Students, Researchers, Academics and Practitioners.

*Geoenvironmental Mapping: Methods, Theory and Practice* Peter T Bobrowsky, 2001-01-01 This text illustrates the range of environmental geoscience mapping presently carried out around the world. Specialists in several countries have contributed a number of subdisciplinary and thematic topics including volcanic hazards, landslides, dolines, tsunamis, radon, potential medical geology, rainfall erosion, engineering geology, borehole stratigraphy, lake sediment geochemistry, aggregate resources and remote sensing. The collection, analysis and interpretation of data by geologists, geographers and engineers typically involves the presentation of information in map form which can range from black and white to colour, 2D to 3D and
