Philippines, 2009 *Circular Economy: The Next Level of Company Success* André Podleisek, Katharina Luban, Roman Hänggi, 2025-02-17 Without any doubt the current prevailing Linear Economy principle of take-make-dispose is inherently unsustainable. Raw materials are extracted, transformed into products and discarded as waste after use. The resulting environmental and economic challenges brought together both practitioners and academics to develop more sustainable methods for production and consumption. Especially the concept of Circular Economy has received a lot of attention. But despite many technical solutions a key question for practical implementation has remained unanswered until now: How can enterprises integrate Circular Economy into their business strategy to leverage success? This book examines the topic of Circular Economy in an entrepreneurial context. It describes ten options for companies to retain value and identifies drivers and enablers for implementing Circular Economy in businesses. A survey among more than 500 industry experts revealed the extent to which retention options were implemented in practice. For the first time relevant drivers and enablers for each retention option were identified. On top of this, case studies of successful circular market offerings shed light on each retention option in detail. The knowledge gained from research and the further shared experiences of experts that contributed to this book result in a 6-step management model. This model provides guidance on how to implement Circular Economy in organisations as an element of operational excellence and as a source of product, service and business innovation. Now every enterprise can start the journey. As the survey and the cases show, Circular Economy is a promising way to the next level of company success. The book at hand will help organisations to develop their own individual approach that matches their business model. In short, you will find: First comprehensive analysis of 10 retention options, their drivers and enablers; Survey of more than 500 companies and in-depth case studies for each retention option; Practical research-based implementation model for companies. Islam, Christianity, and Secularism in Bulgaria and Eastern Europe Simeon Evstatiev, Dale F. Eickelman, 2022-04-25 Is there a return to the religious in post-Communist Eastern Europe that differs from religious trends in the West and the Middle East? Looking beyond immediate events, this book situates public talk about religion and religious practice in the longue durée of the two entangled pasts: Byzantine and Ottoman that implicitly underpin contemporary politics. Islam, Christianity and Secularism situate Bulgaria in its wider region, indicating ongoing Middle Eastern, Russian and other European influences shaping patterns of religious identity. The chapters point to overlapping and complementary views of ethno-religious belonging and communal practices among Orthodox Christians and Muslims throughout the region. Contributors are Dale F. Eickelman, Simeon Evstatiev, Kristen Ghodsee, Galina Evstatieva, Ilia Iliev.
