

Given this information,

- What functional form would you recommend for estimating Model I? Be sure to write out a specific equation.
- What functional form would you recommend for estimating Model II? Be sure to write out a specific equation.
- Would  $R^2$  be a reasonable way to compare the overall fits of the two equations? Why or why not?

*Note:* In the following question, you may want to change the absolute size of the coefficients, depending on the size of your school, but remember to change the size of the standard errors proportionally.

- On your way to the cashier's office (to pay yet another dorm damage bill), you overhear U. R. Accepted (the Dean of Admissions) having a violent argument with I. M. Smart (the director of the Computer Center) about an equation that Smart built to understand the number of applications that the school received from high school seniors. In need of an outside opinion, they turn to you to help them evaluate the following regression results (standard errors in parentheses):

$$\hat{N}_t = 150 + 180A_t + 1.50 \ln T_t + 30.0P_t$$

(90)      (1.50)      (60.0)

$$R^2 = 0.50 \quad N = 22 \quad (\text{annual})$$

where:  $N_t$  = the number of high school seniors who apply for admission in year  $t$

$A_t$  = the number of people on the admission staff who visit high schools full time spreading information about the school in year  $t$

$T_t$  = dollars of tuition in year  $t$

$P_t$  = the percent of the faculty in year  $t$  that had PhDs in year  $t$

How would you respond if they asked you to:

- Discuss the expected signs of the coefficients.
- Compare these expectations with the estimated coefficients by using the appropriate tests.
- Evaluate the possible econometric problems that could have caused any observed differences between the estimated coefficients and what you expected.
- Determine whether the semilog function for  $T$  makes theoretical sense.
- Make any suggestions you feel are appropriate for another run of the equation.

#### Answers:

- See Section 6.2.
  - See Section 6.2.
  - See Section 6.4.
  - Constant =  $\beta_1$ .
  - Positive, since the expected sign of the coefficient of experience is positive and since the simple correlation coefficient between age and experience is positive. See Section 6.1.3.
- See Section 6.1. Note in particular that biased estimates can at times be closer to the true  $\beta$  than unbiased ones and that the solution to omitted variable bias is *not* to simply include every justifiable variable.

## Using Econometrics 6th Edition Answers:

Solutions Manual for Econometrics Badi H. Baltagi, 2022-12-07 This Fourth Edition updates the Solutions Manual for Econometrics to match the Sixth Edition of the Econometrics textbook. It adds problems and solutions using latest software versions of Stata and EViews. Special features include empirical examples replicated using EViews, Stata, as well as SAS. The book offers rigorous proofs and treatment of difficult econometrics concepts in a simple and clear way and provides the reader with both applied and theoretical econometrics problems along with their solutions. These should prove useful to students and instructors using this book. **QFINANCE: The Ultimate Resource, 4th edition** Bloomsbury

Publishing, 2013-09-26 QFINANCE The Ultimate Resource 4th edition offers both practical and thought provoking articles for the finance practitioner written by leading experts from the markets and academia. The coverage is expansive and in depth with key themes which include balance sheets and cash flow, regulation, investment, governance, reputation management, and Islamic finance encompassed in over 250 best practice and thought leadership articles. This edition will also comprise key perspectives on environmental, social, and governance (ESG) factors essential for understanding the long term sustainability of a company, whether you are an investor or a corporate strategist. Also included: Checklists, more than 250 practical guides and solutions to daily financial challenges, Finance Information Sources, 200 pages spanning 65 finance areas, International Financial Information, up to date country and industry data, Management Library, over 130 summaries of the most popular finance titles, Finance Thinkers, 50 biographies covering their work and life, Quotations and Dictionary. **Lives of the**

**Laureates, sixth edition** Roger W. Spencer, David A. Macpherson, 2014-11-28 Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process. Lives of the Laureates offers readers an informal history of modern economic thought as told through autobiographical essays by twenty three Nobel Prize laureates in Economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This sixth edition adds four recent Nobelists to its pages: Eric Maskin who illustrates his explanation of mechanism design with an example involving a mother, a cake, and two children; Joseph Stiglitz who recounts his field's ideological wars linked to policy disputes; Paul Krugman who describes the insights he gained from studying the model of the Capitol Hill Babysitting Coop and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them; and Peter Diamond who maps his development from student to teacher to policy analyst. Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. These lectures demonstrate the richness and diversity of contemporary economic thought. The reader will find that paths cross in unexpected ways that disparate thinkers were often influenced by the same teachers and that luck as well as hard

Using Econometrics 6th Edition Answers: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have charmed audiences this year. Using Econometrics 6th Edition Answers : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Using Econometrics 6th Edition Answers : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
