AI Applications in Sheet Metal Forming
Shailendra Kumar, Hussein M. A. Hussein, 2016-10-25
This book comprises chapters on research work done around the globe in the area of artificial intelligence
AI applications in sheet metal forming
The first chapter offers an introduction to various AI techniques and sheet metal forming while subsequent chapters describe traditional procedures
methods used in various sheet metal forming processes and focus on the automation of those processes by means of AI techniques such as KBS
ANN
GA
CBR etc
Feature recognition and the manufacturability assessment of sheet metal parts
process planning
strip layout design
selecting the type and size of die components
die modeling and predicting die life are some of the most important aspects of sheet metal work
Traditionally these activities are highly experience based tedious and time consuming
In response researchers in several countries have applied various AI techniques to automate these activities which are covered in this book
This book will be useful for engineers working in sheet metal industries and will serve to provide future direction to young researchers and students working in the area
