This Remote Starter with Keyless Entry System has been designed to be installed BY PROFESSIONAL INSTALLERS on fuel injected vehicles with an automatic transmission ONLY.

- Never install this remote starter on a manual transmission vehicle.
- The system must be installed and wired through a safety switch so it will not start in any forward or reverse gear.
- Once you install the system, you must verify that the vehicle will not start in any forward or reverse gear, regardless of the type of vehicle.
- Read the operation manual for operating.
- Do not install any component near the brake, gas pedal or steering linkage.
- Some vehicles have a factory installed transponder immobilized system that can possibly complicate the installation. There is a possibility that this system cannot be installed on some immobilizer equipped vehicles.
- Most vehicles have an SRS or bag system. Use approved care and do not probe any wires of the SRS system.
- Disconnect the car battery before beginning work on the vehicle.
- Check service guides before drilling any holes. Ensure that no wiring harness or other components are located behind the panel that could otherwise be damaged.
- Do not use conventional tuning taps. Solder on any wiring. Poor wiring, or taped joints will possibly introduce unreliability into the alarm system and may result in false alarms or incorrect operation. We suggest soldering all connection points.
- Install the wiring neatly under carpets or behind trim to prevent possible damage to wires.
