Purpose of this guide:

Econometrics is defined by A. H. Studenmund¹ to be "the quantitative measurement and analysis of actual economic and business phenomena." This definition highlights the importance of learning econometrics by working through examples. This guide demonstrates how to use EViews to complete the econometric analysis illustrated in the text. EViews output can be copied and pasted into word processing files to facilitate the research report writing process.

Each chapter in this guide corresponds to a chapter in *Using Econometrics: A Practical Guide (UE)*, by A. H. Studenmund. All of the econometric processes examined in a chapter are reproduced in the corresponding chapter of this guide, using EViews whenever a data set is provided.² This guide is a do-it-yourself manual and students should be able to reproduce the econometric analysis described in *UE*, without further assistance from the instructor. Best results are achieved when the text chapter is read first and then the operations are performed as you read the guide. Most procedures described in this guide are explained in a step-by-step manner so that even the novice user should be able to follow. The reader is advised to consult the owner's manual or the help function in EViews in cases where: a deeper understanding of EViews' functions is desired, a description of how EViews performs the calculations is desired, or references to the source of the econometric theory applied by EViews is sought.

[□] I would like to thank A. H. Studenmund for his helpful comments and a special thanks to Pat Johnson for her superb editorial assistance and for making sure that the instructions in this guide are clear and easy to follow. Your feedback is very valuable - send your comments about this site and this guide to <mailto:rrjohnson@ucsd.edu>.

² For a variety of reasons, data sets for some of the examples presented in the text are not available.
