Computational Methods in Engineering & Science Zhenhan Yao,Mingwu Yuan,2007-12-31 The 9th EPMESC was successfully held in Macao in November of 2003 At the end of the conference the Board of the EPMESC series decided that the next conference would be held in a city of the mainland of China Also I was assigned to be the Chair person of the Conference No doubt this is a great honor to me and also a challenge because there are so many professional international conferences in computational mechanics happening frequently in the world After the successful organizing of WCCM6 in Beijing September of 2004 I engaged to organize the 10th EPMESC First of all I had to choose the venue of the Conference After some investigation and a lot of negotiation we went to see the site of the venue in Sanya Hainan Island the south most city in China Finally we made the decision The most important reason for the choice was the ecological environment of this city It is beneficial to our health after hard work We scientists and engineers need a good relaxing place after working hard a place to enjoy life with friends and family Sanya is an ideal place and a real green city Blue sky and white clouds the peaceful sea and the long beach with white sand shells and pearls no pollution and no industry Everything is so beautiful

Structural Failure and Plasticity X.L. Zhao,R.H. Grzebieta,2000-10-04 As mankind continues to push back the boundaries and begins to explore other worlds and the ocean depths a thorough understanding of how structures behave when subjected to extremes in temperature pressure and high loading rates will be essential This symposium provided the perfect forum for presenting research into structures subjected to such extreme loads There were a large number of papers presented under topics of impact blast and shock loading indicating a strong research interest in high rates of loading Similarly new topics have been added to the traditional symposium list such as fire loading earthquake loading and fatigue and connection failures It is clear now that fundamental knowledge of plastic deformation of structures to various extreme loads is coming of age Each full paper was peer reviewed by at least two experts in the field

The Business of Waterways Management Lucidus Smith, 2014 The Australian company Kimberley Environmental Solutions Pty Ltd was formed in June 2006 for the purpose of harvesting the abundant water weed found in the northern waterways of Western Australia and then turning it into cattle feed There was a serious shortage of cattle feed in the whole of Australia at this time mainly due to the drought conditions that had existed for several years in the eastern states and this shortage of feed also affected the north of Western Australia This book covers all that was learnt during the six years that the company was operational in Kununurra it being wound up in 2013 and the Case Histories Section looks in detail at the projects that the company was invited to bid for in China and Nigeria Most of the major waterways in the world appear to have a weed or algae problem that will have to be dealt with if the world is to continue to enjoy clean fresh water The author of this book and his fellow directors have all come to the conclusion that water weeds and algae are a valuable natural resource that we should find ways of utilizing for the benefit of mankind
