Higher Education, Community Engagement and Entrepreneurship in Southern Africa I. G. Govender,2021-02-24 This volume explores the pressing issues of entrepreneurship education and development in Southern Africa It discusses the various roles of higher education institutions in enhancing entrepreneurship in localised communities and provides a systematic solution for improving the Southern African economy by realising the importance of empowering the youth with entrepreneurial skills In addition successful development requires effective policies and contemporary approaches to both community engagement and entrepreneurship management The book uses different Southern African case studies to discuss the various issues and innovations in entrepreneurship in the country Business Analytics: Progress On Applications In

Asia Pacific Jorge L C Sanz,2016-09-29 Technological advances in the last five years have allowed organizations to use Business Analytics to provide insights increase understanding and it is hoped gain the elusive competitive edge The rapid development of Business Analytics is impacting all enterprise competences profoundly and classical business professions are being redefined by a much deeper interplay between business and information systems As computing capabilities for analysis has moved outside the IT glass house and into the sphere of individual workers they are no longer the exclusive domain of IT professionals but rather accessible to all employees Complex open source data analytics packages and client level

visualization tools deployed in desktops and laptops equip virtually any end user with the instruments to carry out significant analytical tasks. All the while the drive to improve customer experience has heightened the demand for data involving customers, providers and entire ecosystems. In response to the proliferation of Business Analytics a new Center and Masters of Science Program was introduced at the National University of Singapore (NUS). The Center collaborates with over 40 different external partner organizations in Asia Pacific with which all MSBA students undertake individual projects. Business Analytics Progress on Applications in Asia Pacific provides a useful picture of the maturity of the Business Analytics domain in Asia Pacific. Optimality-theoretic Syntax, Semantics, and Pragmatics Géraldine Legendre, Michael T. Putnam, Henriëtte de Swart, Erin Zaroukian, 2016. This book investigates the morphosyntactic semantic and pragmatic properties of language and the interactions between them from the perspective of Optimality Theory. It integrates optimization processes into the formal and functional study of grammar interpreting optimization as the result of conflicting violable ranked constraints. Unlike previous work on the topic this book also takes into account the question of directionality of grammar. A model of grammar in which optimization processes interact bidirectionally allows both language generation (the process of selecting the optimal form of a given meaning) and language interpretation (the process of optimal interpretation of a given form) to be taken into account. Chapters in this volume explore the consequences of both symmetric unidirectional and asymmetric bidirectional versions of Optimality Theory investigating the syntax semantics interface, first language acquisition and sequential bilingual grammars. The volume presents cutting edge research in Optimality Theoretic syntax and semantics as well as demonstrating how optimization processes as modelled in this formalism serve as a viable approach for linguists and scholars in related fields.

Corporate Social Responsibility and Discrimination Christina Keinert-Kisin, 2016-04-27. This book presents and deconstructs the existing explanations for the differential career development of qualified men and women. It reframes the problem of discrimination in the workplace as a matter of organizational ethics, social responsibility and compliance with existing equal opportunity laws. Sensitive points are identified where social biases, decision makers' individual economic interests and shortcomings of organizational incentive policies may lead to discrimination against qualified women. The ideas put forward are empirically tested in an original laboratory experiment that examines personnel selection in the male dominated field of science and technology. It contrasts the selection of applicants with gendered and gender blind applications available to subjects under controlled conditions. 30% of participants were high level decision makers which is unprecedented in this field of research. The results highly relevant for organizational practice are explained and discussed in detail.

Operations Research Education Jeroen Beliën, Ana Paula Teixeira, Hans W. Ittmann, João Luís de Miranda, Marco Laumanns, Margarida Vaz Pato, 2018-02-16 This edited monograph contains a comprehensive overview of educational developments in the fields of operations research OR and management science MS The book outlines key factors in OR MS curricular programs and analyses different approaches regarding student enrollment and failure rates The approach is genuinely international whereas the focus lies on the European level The target audience primarily comprises public policy planners in education deans and school directors as well as program coordinators Ad-hoc, Mobile, and Wireless Networks

Nathalie Mitton, Valeria Loscri, Alexandre Mouradian, 2016-06-17 This book constitutes the proceedings of the 15th International Conference on Ad Hoc Networks and Wireless ADHOC NOW 2016 held in Lille France in July 2016 The 23 full papers presented together with one short paper in this volume were carefully reviewed and selected from 64 submissions The contributions are organized in topical sections named resource allocation theory and communications PHY MAC routing in sensors IoT DTN opportunistic networks sensors IoT security VANET and ITS and robots and MANETs Unleashing Growth and Strengthening Resilience in the Caribbean

Mr. Krishna Srinivasan, Ms. Inci Otker, Ms. Uma Ramakrishnan, Mr. Trevor Serge Coleridge Alleyne, 2017-11-13 This book provides a diagnosis of the central economic and financial challenges facing Caribbean policymakers and offers broad policy recommendations for promoting a sustained and inclusive increase in economic well being The analysis highlights the need for Caribbean economies to make a concerted effort to break the feedback loops between weak macroeconomic fundamentals notably pertaining to fiscal positions and financial sector strains and structural impediments such as high electricity costs limited financial deepening violent crime and brain drain which have depressed private investment and growth A recurring theme in the book is the need for greater regional coordination in finding solutions to address the Caribbean's shared and intertwined macroeconomic and structural challenges The analysis suggests that strengthening regional and global market integration of Caribbean economies would provide an impetus to sustained growth in incomes and jobs Greater regional and global economic integration would also facilitate structural transformation and a shift toward new economic activities resulting in more diversified and less vulnerable economies A central challenge for the Caribbean is thus to come together as a region overcome the limitations posed by size and garner the benefits of globalization Efforts should build on existing regional arrangements accelerating progress in implementing these agreements would stimulate trade Policymakers could also promote deeper integration with Latin America and the rest of the world by pursuing new trade agreements leveraging current agreements more effectively or deepening them to include areas beyond traditional trade issues and developing port and transport infrastructure
