Scientific and Technical Aerospace Reports ,1977 People's Banks Henry William Wolff,1910 **License to Drill** Cari L. Votava,Jeanne M. in natural resource management can open a Pandora's box of corruption risks. This manual provides methods and options based on good practices to improve transparency, accountability, and integrity in the regulatory licensing process and integrity due diligence. The manual borrows models from the Basel Core Principle fit and proper concept and provides options for conducting effective a) beneficial ownership, b) criminal legal, and c) conflicts of interest checks with a goal of integrating these into the regulatory licensing process. The manual also identifies common legal framework defects that can facilitate corruption risks and offers options based on principles of regulatory integrity to reduce these risks. The good practices identified can help countries allocate limited financial resources in conducting thorough background checks in a cost-effective manner as well as meet EITI's requirements for public disclosure of beneficial owners and politically exposed persons. These strategies for reducing opportunities for corruption in extractive sectors can help reduce IFFs that can sap resources from the economy and inhibit a country's ability to achieve the Sustainable Development Goals.
