Human Resource Management in Shipping
Lijun Tang, Pengfei Zhang, 2021-03-14 This book sheds light on the nature and causes of the issues and challenges in human resources in shipping and proposes fresh recommendations to manage them It explains the multiple forces at play including the global regulatory regime national institutional frameworks industrial practices trade union responses and pressures from customers and non governmental organisations Human Resource Management in Shipping integrates seafarer employment data released by national maritime authorities and a large body of literature that discusses discrete human resources issues in shipping into a single volume providing readers with a comprehensive understanding of the issues and challenges within human resources in shipping Beyond this the book also offers a fresh perspective on some of the long lasting HRM challenges in the industry such as skills shortage and seafarer recruitment and retention This book aims to provide readers with systematic and in depth knowledge of human resource management in shipping and offers researchers a valuable source of reference and a solid foundation on which further development can be built

Lives in Peril D. Walters, N. Bailey, 2013-09-30 *Lives in Peril* demonstrates how and why seafarers are a vulnerable group of workers It argues they are made so by the organisation and structure of their employment the prioritisation of profit over safety by the actors that engage and control their labour the limits of enforcement of the regulatory framework that is in place to protect them and by their weakness as collective actors in relation to capital The consequences of this vulnerability are seen in data on their occupationally related morbidity and mortality evidence that probably only represents a partial picture of the actual extent of the physical mental and emotional harm resulting from work at sea This volume s central argument is that this situation is likely to remain broadly unchanged as long as global maritime governance and regulation remains in thrall to the neo liberal economic and political arguments that drive globalisation and fails to enforce regulatory standards more robustly
