*The Effects of Task Type and Instructions on Second Language Acquisition* Hayo Reinders,2009-12-14 Recent years have seen a growing interest in the role of tasks in second language acquisition and a substantial body of research now exists to show their potential contribution to language learning and teaching However not much is known about the effects of different task types nor about their accompanying instructions Which tasks are more successful under what circumstances What type of instructions should be included This book attempts to answer the questions above by first examining previous studies on the use of tasks the roles of input output and interaction and by placing these in a broader cognitive framework It argues that in order to understand the effects of different task types it is important not only to look at learning outcomes acquisition but also at the effects on immediate task performance intake and by doing so to arrive at a more complete picture of the learning process

The book presents the results of a study on the effects of 1 implicit and explicit inductive instructions and 2 three task types on both intake and acquisition of two English grammatical structures The study used various measures to determine intake as well as the development of both implicit and explicit knowledge The results of the study support the claims made for the benefits of Focus on Form but do not support the claims made for the benefits of more explicit types of instruction Further the results show that there is no direct relationship between intake and acquisition and that different task types can have a differential effect on immediate task performance on the one hand and learning on the other The book discusses these findings in the light of previous research and considers their implications both at the theoretical level and for language teaching practice
