Person's Served Mood	Check box(es) to document the person's observed or reported mood during the group session.
Stressors/Extraordinary Events/New Issues Presented Today	<p>There are four options available for staff using this section of the progress note:</p> <ol style="list-style-type: none"> 1. If person does not report/present any new issues, mark "None Reported" and proceed to planned intervention/goals. 2. If person reports a new issue that was resolved during the session check the "New Issue resolved, no CA Update required" box. Briefly document the new issue, identify the interventions used in the Therapeutic Interventions section and indicate the resolution in the Response section of the progress note. If services are provided during the session that have not been previously ordered in the Individualized Action plan, then an explanation of the rationale for those services should be provided. 3. If person presents an issue that has been previously assessed and for which Goals/Objectives and services have been ordered, then the information may be briefly documented as an indicator of the progress or lack of progress achieved. 4. If person presents any new issue(s) that represent a therapeutic need that is not already being addressed in the IAP, check box indicating a "CA Update Required" and record notation that new issue has been recorded on a Comprehensive Assessment Update of the same Date and write detailed narrative on the appropriate CA Update as instructed in this manual. Also, the newly assessed therapeutic information may require a new goal, objective, therapeutic intervention or service that will require further use of the IAP Review/Revision form. <p>Example: Person became uncharacteristically angry with another group member during the group session and the two began arguing loudly. Group therapist intervened and assisted person with identifying what had triggered excessive anger today. Person was able to recognize that the other group member reminded her of her abusive uncle and apologized to the other member.</p> <p>Example of New Issue needing CA Update: The person reported new symptoms of nightmares, intrusive memories, and</p>

Behavioral Group Therapy Dennis Upper,Steven M. Ross,2013-11-11 In 1977 the current editors contributed a review article on behavioral group therapy to a volume of Hersen Miller and Eisler s Progress in Behavior Modification series 1977 At that time we noted that despite the advantages to both clinicians and clients of conducting behavioral treatments in groups clinical developments and research in this area were still at a relatively rudimentary level The majority of studies in the behavioral group therapy literature we reviewed reported the direct transfer of an individual behavior therapy procedure such as systematic desensitization to a group of clients with homogeneous problems such as snake phobia or test anxiety Groups were used in many studies merely to generate sufficient numbers of subjects to allow various types of interventions to be compared rather than to examine group process variables per se Only a limited amount of attention had been given to whether these group interaction variables such as group discussion sharing ideas and feelings and mutual feedback and reinforcement might enhance individually oriented procedures applied in a group The 8 years since this original chapter was

written have seen a significant growth in both the breadth and depth of clinical research and work in the behavioral group therapy field This growth was documented in part in a three volume series on behavioral group therapy by the current editors Upper Ross 1979 1980 1981 **Integrative Group Treatment for Bulimia Nervosa** Helen Riess, Mary Dockray-Miller, 2002 The only eating disorder treatment manual for group application available this book presents an integrative treatment model bringing together psychoeducational cognitive behavioral relational experiential and interpersonal methods The introduction begins with a detailed discussion of bulimia s cultural roots as well as its epidemiology and etiology moves to a survey of available treatments and concludes with a rationale for use of the integrative group methods Jacket **The future of psychology: Approaches to enhance therapeutic outcomes** Peta Stapleton, Oliver Baumann, Dawson Church, 2023-01-30 Handbook of Group Psychotherapy Addie Fuhrman, Gary M. Burlingame, 1994-06-14 Intended as the group therapy equivalent to Bergin and Garfield s The Handbook of Psychotherapy and Behavior Change Renowned contributors offer a comprehensive survey of all empirical evidence concerned with process and outcome in group therapy Contains both general considerations and applications to specific disorders and with determinate populations *Research in Psychotherapy* Robin Fox, 2017-07-12 Research in Psychotherapy is a comprehensive synthesis and assessment of the psychotherapeutic research literature for the use of both researchers and those in clinical practice It is designed as a general reference work an instruction guide and a source of information about specific aspects and problems of research The book consists of three parts Part 1 discusses principles and methods of research as they are applied to psychotherapy It provides general background material and principles to help non researchers appreciate some of the important problems that are encountered In Part 2 existing research on the effects of psychotherapy and the determinants and correlates of outcome are clustered and reviewed Chapters 4 to 7 are concerned strictly with a review and appraisal of controlled studies that were designed to evaluate the effects of psychotherapy Chapters 8 to 13 deal with a large body of research on various factors associated with therapeutic outcome method style and technique variables patient therapist and time variables Part 3 is concerned with research on aspects of the therapeutic process and on the effect of many of these same variables on the therapeutic interchange as distinct from the outcome of therapy Also discussed is research on various therapeutic phenomena and conditions about which so much has been written and so little really known Research in Psychotherapy was written in the conviction that clinical practice should be influenced by research and that rigorous research that meets acceptable experimental standards can be done on the field of psychotherapy *Cognitive-behavioral Group Therapy for Social Phobia* Richard G.
