Reflection Papers

What is it?

A reflection is a paper where you are asked to write your own ideas and thoughts about something. Often reflections are written to enable the writer to give serious thought or consideration to a past experience, but they can also be assigned as a reflection to a text.

What is the purpose?

The purpose for writing reflective papers is to help students improve on their analytical skills because in order to write an effective reflection, students have to not only express what they think, but how and why.

Can I get it wrong?

Reflections have no right or wrong answers and they do not argue ideas since they are based on personal experience. Therefore, the main component of a reflection should be an analysis of observations, experiences, and opinions from your own point of view. Ensure you have answered every part of the prompt from your instructor and provide plenty of details as a reflection is generally a deep analysis.

Steps to Writing a Reflection Paper

1. Narrow down a topic if one has not been provided for you by your instructor. A reflection requires a deep analysis, so narrow down the topic.
2. Brainstorm what you will say about the topic.
3. Make an outline to organize your thoughts.
4. Write your paper. Make sure to include an introduction that ends with a thesis.
5. Expand on your ideas in the body paragraphs. If your opinion changed, your body paragraphs can walk your reader through how the change occurred. A common way to format this is chronologically. The amount of body paragraphs will be determined by the requirements from your instructor.
6. End with a conclusion that wraps everything up for your reader. In the conclusion, you may also want to include how this experience will affect you moving forward.

Engaging with Vocation on Campus Karen Lovett, Stephen Wilhoit, 2021-12-29. Bringing together narratives and theory-based analyses of practice, this volume illustrates collaborative curricular and co-curricular approaches to promoting vocational discernment amongst students in a Catholic university setting. Drawing on cultural, religious, and secular understandings of vocation, *Engaging with Vocation on Campus* illustrates how contemporary issues around vocation, work, and careers can be addressed within the Catholic intellectual and spiritual tradition. Chapters present a range of contributions from students, faculty, and staff from a single institution to highlight practical approaches to supporting students in this area and acknowledge the complementary and intersecting roles played by student support services, academic staff, and on-campus ministry in helping students develop an individualised understanding of vocation. Considering the value of both curricular or non-curricular activities and processes, the volume highlights spiritual, personal, and community value in offering students explicit and tailored support. This text will benefit researchers, academics, and educators with an interest in higher education, religious education, and the Christian life and experience more broadly. Those specifically interested in career guidance, theological curriculum, and pedagogy and Roman Catholicism will also benefit from this book.

Teaching and Learning English in Japanese Classrooms Darren Elliott, 2023-05-19. This book shows how English language instructors in Japan explored the questions and issues which most closely affected them and their students in the language learning process. Each of the teacher-researchers had a puzzle. After reviewing existing literature, each writer found a way to adjust their practice, and in these chapters, they report on the results. Topics include educational technology, learner autonomy, feedback, and novel approaches to listening, reading, and writing instruction. Although the contributors are working in Japan, classroom practitioners from the wider international language teaching community can benefit from the practical teaching approaches and accessible descriptions of practitioner research to be found in this book. A secondary audience of educational managers and teacher trainers will also find value in chapters which outline the ways in which an environment conducive to practitioner research can be facilitated.
