

Professional Learning Plan

Name Miranda Palmer

Date January 6th 2017

This Professional Learning Plan (September 2015) was designed for voluntary CPL program participation. The Professional Learning Plan will be updated for members to use for mandatory CPL participation beginning in September 2017.

Area for Growth or for Leadership Development (Ethical or Practice Standard)	Professional Learning Goal	Professional Learning Activities	Projected Timelines
Transfer the ethical or practice standard you identified as an area for growth or for leadership development in your Self-Assessment Tool into this field.	Identify a goal relating to enhancing your practice in this area.	Determine what professional learning activities you will need to complete in order to meet your goal.	Estimate when you will begin to undertake professional learning activities and/or strategies and when you plan to reach your goal.
I.C. Establish and maintain open communication with parents and/or legal guardians.	I believe that caregivers should be included in their child(ren)s growth, and I strongly believe that there is a significant difference between including parents in the lives of their children and simply informing them about their children's day. My goal is to not just notify parents of how their child's day was in various childcare settings, but also make sure I am doing what I can, so that the caregivers can feel included in their child(ren)s daily practices, even when they cannot be present.	I will look into more, less common/ traditional ways to make parents feel more included in their child's day. As opposed to sheets of paper indicating how a child's day was, I plan to include parents more by making monthly one-on-one visits when they enter the room, maintaining open communication and sharing good stories about their child's day. I will write down what their child says about their week, the day and share that with them. I will also attend any workshop on parent involvement.	Once I start working in the field and become registered with the College I can begin working on these goals. Until then, I can work on attaining these goals in my school placement settings.
I.E. Establish professional and caring relationships with children and families.	I believe that I continually establish professional and caring relationships with the children I encounter. It regards to the caregiver. I find that often the relationship is more professional than caring. Sometimes this can be a difficult thing to do, however, with more professional learning, my goal is to make the caregivers that I encounter feel like partners with myself and often educators in teaching their child(ren).	I believe that by adjusting the meaning of parent involvement, as stated above, I can foster a more caring relationship with caregivers as opposed to it being more professional. With continued open communication, chats with parents and greetings, I believe that the caregivers relationship with me can be not only professional, but also caring.	Once I start working in the field and become registered with the College I can begin working on these goals. Until then, I can work on attaining these goals in my school placement settings.
III.1. Provide care and education to individuals, small groups and large groups.	I find that I work mostly with individuals with developmental differences. This makes care and education in large group settings less ideal due to the fact that care is received more on an individual level. With continual professional learning, my goal is to acquire new skills in regards to teaching and caring for larger groups of children with disabilities.	I will attend workshops to better understand how to provide learning experiences and education to large groups of individuals who have developmental differences.	Once I start working in the field and become registered with the College I can begin working on these goals. Until then, I can work on attaining these goals in my school placement settings.
