, *A Research Report based on an analysis of Service Quality of Sports Centre* Md. Rajibul Hasan,2013-01-22 Seminar paper from the year 2011 in the subject Business economics Offline Marketing and Online Marketing grade Distinction University of Lincoln course titel language English abstract It is an immensely complex exercise to measure the quality of a service There are differences between product and service In case of product there are precise specifications such as length depth width weight color etc On the other hand a service can have several intangible or qualitative features In addition there are some expectations of the consumer regarding the service which can differ significantly based on a range of factors such as experience personal requirements and what other people may have said to them To determine the service quality Parasuraman Zeithaml and Berry 1994 have developed a methodology known as SERVQUAL which is a service quality questionnaire survey methodology SERVQUAL model suggested five dimensions of service quality They are reliability responsiveness tangibles empathy and assurance Experiences or perceptions and expectation are measured in SERVQUAL model and SERVQUAL model has been well used in retail surroundings Berry 1986 Brown et al 1993 Carmen 1990 Finn and Lamb 1991 Dabholkar et al 1996 including banking fast food dry cleaning Cronin and Taylor 1992 and health care Babakus and Mangold 1989 In diversified businesses as the technologically advanced industrial market Pitt et al 1992 and B2B business to business services Brensinger and Lambert 1990 include the application of the SERVQUAL However this model raises some doubts as to whether expectations are being assessed at all The gap measured by the SERVQUAL model between expectation and perception is uncertain as to whether this is an indication of initial expectation or how the service is continuously reevaluated whilst it is being executed or experienced Therefore SERVPERF model is proposed by Cronin and

Taylor 1992 and this model eliminates expectation from the SERVQUAL and it measures the service quality based on service perception In this paper the SERVPERF model is used to measure the service quality of the sports centre *ASSESSMENT OF SERVICE QUALITY IN HEALTH INSURANCE SECTOR A STUDY WITH SPECIAL REFERENCE TO CHENNAI CITY* Dr. S.T.KRISHNEKUMAAR, Dr. K.S.MEENAKSHI SUNDARAM, *Libraries Act on Their LibQUAL+ Findings* Fred M. R. Rodrigues, 2013-05-22 This book is very useful for it is not just descriptive in its nature but prescriptive too It is descriptive in the sense that it describes the process of developing or using a metric in a problem situation and prescriptive as it clearly prescribes how a beginner can put the theory into practice In this globalized economy maintaining quality of products and services has been the thrust area of interest among academicians and practitioners Today there are quite a good number of books and research articles available Nevertheless service quality measurement has always posed problems particularly in the context of service industries due to the difficulty in the measurement of the intangibles and implied needs of the customers The research literature is filled with articles on how to quantify the services and there are several streams

of arguments on the choice of the most ideal approach However the research gap lies in the answer to the question Do these measurement instruments concur in their measurement outcomes or do they give different results in the same situation This book primarily makes an attempt to answer this question through a case study approach Even though there are several instruments for the measurement of service quality the two most widely used instruments are SERVQUAL and SERVPERF metrics Comprehensively this book explains the systematic procedure of using both the instruments in a service sector and further the procedure for conducting a statistical analysis so that one will be able to apply the same in any service sector It then takes the reader through a series of tests in order to compare the two metrics and to prove statistically if there is the same outcome in a problem situation The results are sure to surprise the reader and trigger the research bent of mind to undertake a similar study of such metrics and gain mastery over performing an independent research with very minimal guidance from a professional guru
