Enhancing Procurement Practices Attila Kovács, 2011-06-27 *Enhancing Procurement Practices* is organised around four main points overview and analysis of procurement principles practical approach to drafting of solicitation and contract documents conduct of procurement procedures overview of the e procurement arena Although the addressed procurement methods can be used on a wide scale this book concentrates primarily on such cases when the subject of procurement is complex or the solicited goods and services are relatively simple but the intended long term relationship calls for a fairly conscious source selection Project procurement the most complicated form of buying civil engineering work goods and services is thoroughly addressed Beyond the structured overview and comparative analysis of terminology and principles the book describes such new concepts as single source preference for simultaneous procurements dual term frame contract for parallel suppliers and the use of semi consolidated contract documents Effective utilisation of theories boils down among others to a consistent set of procurement related terms proven methodology for drafting comprehensive solicitation documents and contracts and practical details of communication with offerors International Commerce ,1970 **The City Record** New York (N.Y.),1877 **Government Contracts** Herman R. Holtz, 2012-12-06 He who knows and knows that he knows is wise follow him ANCIENT PROVERB During a long career of public service as a government procurement and contracting official I am still surprised to find big successful corporations making the same mistakes that neophytes in government contracting make And this is particularly true in the matter of writing proposals which are the crucial element in most major procurement awards It is true enough as many suspect that the big well known company has something of an edge over the smaller lesser known company competing for any given government contract psychologically at least The typical government executives whether contracting officials or program managers tend to have a bit more faith in the ability of the large company to carry out the program successfully All things being equal then the big company is more likely to get the nod However because the large companies are well aware of that many tend to become fat dumb and happy they try to coast or rest on their laurels That is they get careless about making a strong enough case for themselves in writing their proposals And when they lose often to smaller companies they are both puzzled and outraged They have forgotten that all government procurement is a competition usually both technical and cost competition and that the little guy can win against the big guy if he tries hard enough And especially if the bigger guy is a bit careless and does not put out his best effort
