## Introduction

The understanding of the differences in sex drive can help to explain the changes in human relationships, especially when it comes to sex. The growing number of gays and lesbians in the recent years has made social scientists and psychologists come up with an explanation of the proliferation of people who are ascribing to homosexuality than ever. The understanding of sex drive in both men and women can help to bring out the conundrum in the shifting relationship boundaries. Several studies have already indicated that men's sex drive was more leaned towards the opposite sex while women tended to lean with equal intensity to both sexes. This paper is a critic of an article that seeks to find out whether higher sex drive is associated with the increased sexual attraction in both men and women.

The primary problem of the article which formed the basis of the research was to find out whether sex drive was related to the increase of sexual attraction of individuals towards both men and women. The problem of the study is based on the literature review presenting a number of findings on the problem. Obtained data revealed that, indeed, men and women differ in their sex drive when it comes to the attraction towards the representatives of both sexes. In particular, the reviewed literature indicated that women show sex drive of equal intensity when they see an attractive man as much as an attractive woman; in other words, women have more bisexual nature than their counterparts man whose sex drive to either same-sex partner or the opposite sex partner was unwavering. Understanding of this issue was important in forming the basis of the study.

The author of the article provided a strong argument concerning the existence of differences in sex drive among men and women. The article provides an

**Feedstock-based Bioethanol Fuels. I. Non-Waste Feedstocks** Ozcan Konur,2023-12-22 This book aims to inform readers about the recent developments in production evaluation and utilization of bioethanol fuels from non waste feedstocks It covers the production of bioethanol fuels from first generation starch feedstocks and sugar feedstocks grass biomass wood

biomass cellulose biosyngas and third generation algae In this context there are nine key sections where the first four chapters cover the production of bioethanol fuels from feedstocks at large and non waste feedstocks This book shows that pretreatments and hydrolysis of the non waste feedstocks fermentation of hydrolysates and separation and distillation of bioethanol fuels are the fundamental processes for bioethanol fuel production from these non waste feedstocks with the exception of the biosyngas feedstocks This book is a valuable resource for the stakeholders primarily in the research fields of energy and fuels chemical engineering environmental science and engineering biotechnology microbiology chemistry physics mechanical engineering agricultural sciences food science and engineering materials science biochemistry genetics molecular biology plant sciences water resources economics business and management transportation science and technology ecology public environmental and occupational health social sciences toxicology multidisciplinary sciences and humanities among others

*Research Perspectives on White-Collar and Corporate Crime Convenience* Petter

Gottschalk,2025-01-06 This study identify current research perspectives on white collar and corporate crime convenience an important emergent area of research It applies the theory of convenience to research articles on white collar and corporate crime recently published in the most relevant journals addressing economic crime This kind of white collar corporate crime is often committed by persons of respectability and high social status who commit financial crime based on their trusted professional positions with high social status While convenience theory covers fourteen convenience propositions there is varying attention to them in the reviewed articles For example a frequent topic analysed in the journal articles is online romance fraud where victims were not on guard because they trusted their offenders Trust tends to strengthen the convenience proposition addressing lack of guardianship oversight and control The book adds substance to the theory of convenience that emerged less than a decade ago and has since been developing and applied by various scholars The review is also interesting from the perspective of understanding what aspects of crime convenience are implicitly and explicitly addressed in economic criminology research that is whether motives opportunities or attitudes are mainly addressed in financial crime research so far The second part of the book presents several short case studies on topics including fraud tax evasion and money laundering The final part of the book discusses gender convenience perspectives and the emerging issues around digital fraud

**A Practical Guide to Teaching Research Methods in Education** Aimee LaPointe Terosky,Vicki L. Baker,Jeffrey C. Sun,2023-03-23 A Practical Guide to Teaching Research Methods in Education brings together more than 60 faculty experts The contributors share detailed lesson plans about selected research concepts or skills in education and related disciplines as well as discussions of the intellectual preparation needed to effectively teach the lesson Grounded in the wisdom of practice from exemplary and award winning faculty from diverse institution types career stages and demographic backgrounds this book draws on both the practical and cognitive elements of teaching educational and related research to students in higher education today The book is divided into eight sections covering the following key elements

within education and related research problems and research questions literature reviews and theoretical frameworks  
 research design quantitative methods qualitative methods mixed methods findings and discussions and special topics such as  
 student identity development community and policy engaged research and research dissemination Within each section  
 individual chapters specifically focus on skills and perspectives needed to navigate the complexities of educational research  
 The concluding chapter reflects on how teachers of research also need to be learners of research as faculty continuously  
 strive for mastery identity and creativity in how they guide our next generation of knowledge producers through the research  
 process Undergraduate and graduate professors of education and related research courses dissertation chairs committee

**Bioethanol Fuel Production Processes. II** Ozcan Konur, 2023-12-22 This book provides an overview of the research on production processes for bioethanol fuels in general  
 hydrolysis of the pretreated biomass for bioethanol production microbial fermentation of hydrolysates and substrates with  
 yeasts for bioethanol production and separation and distillation of bioethanol fuels from the fermentation broth  
 complementing the research on biomass pretreatments presented in the first volume It presents an overview of the research  
 on biomass hydrolysis in general wood hydrolysis straw hydrolysis and cellulose hydrolysis for bioethanol fuel production in  
 the first section for biomass hydrolysis It provides an overview of the research on microbial hydrolysate fermentation for  
 bioethanol production in general alternative fermentation processes for bioethanol fuel production such as simultaneous  
 saccharification and fermentation SSF and consolidated biomass processing CBP compared with the separate hydrolysis and  
 fermentation SHF process metabolic engineering of microorganisms and substrates for bioethanol fuel production and  
 utilization of *Saccharomyces cerevisiae* for microbial fermentation of hydrolysates for bioethanol fuel production in the  
 second section for hydrolysate fermentation It provides an overview of the research on the bioethanol fuel separation from  
 the fermentation broth in the last section This book is a valuable resource for the stakeholders primarily in the research  
 fields of energy and fuels chemical engineering environmental science and engineering biotechnology microbiology  
 chemistry physics mechanical engineering agricultural sciences food science and engineering materials science biochemistry

humanities among others      *Media Analysis and Public Health* Lesley Henderson, Shona Hilton, Judith Green, 2020-06-29 This volume showcases new approaches to studying public health in traditional and emerging media suggesting that we need more analyses that focus on the production of media and on power dynamics as well as studies of audience reception of media messages The collection asks a variety of questions about the role of media in analysing public health Contributors ask who is influential in producing the stories we see in the press and on social media Who benefits and who is damaged by media debates on health topics They investigate the role of big business in seeking to shape public opinion and consumption in print and online media how issues such as hand washing come to be framed over time by newspapers how conflicts over immunisations get covered how health promotion messages do their work and the positive role of online media in helping foster drug safety Together they reach the conclusion that since mass media is a crucial element of civic society more in depth understanding of how it works and what impacts it has on public health is essential Given the crucial role of the media in shaping health debates pushing certain issues up the policy agenda defining problems for audiences and presenting potential solutions this book's analysis will be of interest to all those studying how the media shape policy as well as public health researchers with an interest in mass communication This book was originally published as a special issue of *Critical Public Health*      Handbook of Research Methodology 9781545703403, This comprehensive Handbook is aimed at both academic researchers and practitioners in the field of research The book's 8 chapters provide in depth coverage of research methods based on the revised syllabus of various universities especially considering the students of under graduate post graduate and doctorate level This book is a product of extensive literature survey made by the authors The authors have made sincere efforts to write the book in simple language The book comprises all the aspects according to new syllabus of PCI and APJ Abdul Kalam Technical University Lucknow Though this book is intended for the use of pharmacy students of any level yet it can also be useful to students of applied fields and medical students The book deals with interdisciplinary fields such as finding research problems writing research proposals obtaining funds for research selecting research designs searching the literature and review collection of data and analysis preparation of thesis writing research papers for journals citation and listing of references preparation of visual materials oral and poster presentation in conferences minutes of meetings and ethical issues in research At the end of every chapter and book some questions related to chapter have been mentioned for the support of students to understand the subject Valuable suggestions for the improvement of this book are most welcome      **Bioethanol Fuel Production Processes. I** Ozcan Konur, 2023-12-22 This book presents research on biomass pretreatments which are a fundamental part of bioethanol fuel production to make biomass more accessible This book also includes an introductory section on the bioethanol fuels Bioethanol Fuel Production Processes I Biomass Pretreatments is the first volume in the Handbook of Bioethanol Fuels Six Volume Set The primary pretreatments at the macro level are the biological chemical hydrothermal and mechanical pretreatments of the biomass It also has an

introductory section on the biomass pretreatments at large for bioethanol fuel production The major pretreatments at the micro level are the enzymatic and fungal pretreatments of the biomass as the biological pretreatments acid alkaline ionic liquid and organic solvent pretreatment pretreatments of the biomass as the chemical pretreatments steam explosion and liquid hot water pretreatments of the biomass as the hydrothermal pretreatments and milling ultrasonic and microwave pretreatments of the biomass as the mechanical pretreatments The first volume also indicates that a wide range of pretreatments stand alone or in combination with each other fractionate the biomass to its constituents of cellulose lignin and hemicellulose and improve both sugar and bioethanol fuel yield making this bioethanol fuel more competitive in relation to crude oil and natural gas based fossil fuels This first volume is a valuable resource for the stakeholders primarily in the research fields of energy and fuels chemical engineering environmental science and engineering biotechnology microbiology chemistry physics mechanical engineering agricultural sciences food science and engineering materials science biochemistry genetics molecular biology plant sciences water resources economics business management transportation science and technology ecology public environmental and occupational health social sciences toxicology multidisciplinary sciences and humanities among others

**Feedstock-based Bioethanol Fuels. II. Waste Feedstocks** Ozcan Konur, 2023-12-22 This book provides an overview of research on the production of bioethanol fuels from waste feedstocks such as second generation residual sugar and starch feedstocks food waste industrial waste urban waste forestry waste and lignocellulosic biomass at large with 17 chapters In this context there are eight sections where the first two chapters cover the production of bioethanol fuels from waste feedstocks at large This book is the fourth volume in the Handbook of Bioethanol Fuels Six Volume Set It shows that pretreatments and hydrolysis of the waste feedstocks fermentation of hydrolysates and separation and distillation of bioethanol fuels are the fundamental processes for bioethanol fuel production from these waste feedstocks This book is a valuable resource for stakeholders primarily in research fields of energy and fuels chemical engineering environmental science and engineering biotechnology microbiology chemistry physics mechanical engineering agricultural sciences food science and engineering materials science biochemistry genetics molecular biology plant sciences water resources economics business and management transportation science and technology ecology public environmental and occupational health social sciences toxicology multi disciplinary sciences and humanities among others
