

## Exploratory Essay Sheet

For your first essay for this course, you must write a persuasive exploratory paper in which you explain the controversy surrounding the issue you chose and state your position on the issue. The paper should present the preliminary research you have done to explore the three positions on the issue: the viewpoints in favor of (pro), against (con), and in the middle ground. Most of the paper will consist of your explanation of the three positions. The rest will consist of the preliminary case you will make for your position. Be as objective as you can in explaining the three positions. If you want to counter any of the points, you can do so when you present your case for your position.

The paper should conform to the standard organization of an academic paper: an introduction with clear thesis, body paragraphs with topic sentences, and conclusion. In the introduction, be sure to define the issue by briefly suggesting its history or background. When did your topic become controversial? What was the situation regarding the topic before the controversy arose? What was the situation after? What broader implications, if any, does the issue have? Don't forget to briefly define important terms and to provide brief explanations where necessary for an unfamiliar audience.

Your thesis should be a clear, direct statement that presents the three positions and that gives your position. You may have a single paragraph introduction with the thesis at or near the end of it. However, you also have the option of presenting your thesis in a paragraph later than the first one, similar to the placement of the thesis in the "Homosexual Marriage" essay. This choice is up to you: neither option is more "correct" than the other.

The body paragraphs should present in an objective discussion each of the three positions, as well as your case for your position. You should quote from, paraphrase, or summarize your source material in order to develop the body paragraphs. You may have only two block quotations of only four lines each. Use paraphrase and summary primarily to present the positions. Be sure to properly credit all source material (whether direct quotation, paraphrase, or summary) by using correct MLA documentation techniques.

In the conclusion, summarize the three positions. Then press your stand or point of view on the issue.

**Small Sample Size Solutions** Rens van de Schoot, Milica

Miočević, 2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics **Industry 5.0 and Paradigm Shift—Emerging Challenges**

Namit Gupta, Roopa Shinde, Rakesh Kumar Malviya, Anjali Gupta, 2023-01-23 Industry 5.0 is the successor of the Industry 4.0 concept which employed high technology in the manufacturing industry Industry 5.0 is a new idea that adds a human touch to the work of robots and smart machines The basic idea of humans and machines working together is to increase efficiency and effectivity like the Internet of things IoT It aims to merge the increasing cognitive computing abilities of the robots with the intelligence and resourcefulness of the humans The progress of Industry 5.0 is inevitable As the technology grows more each day we find ways to make our work simpler The development of such technologies to make the world more efficient requires its manufacturers i.e humans who collaborate with these machines and technologies Humans are indispensable resources as what a machine can do is limited And with all these efficiencies we have come so far there is no path leading us back With adoption of new concepts comes a paradigm shift as development continues and we move from Industry 4.0 which speaks of the future of production its primary purpose continues to be achieving seamless connectivity between machines

and IT systems for higher productivity and efficiencies across the value chain Overall it focuses mainly on traditional financial and operational KPIs Whereas Industry 5.0 gives a human touch to the concept of 4.0 keeping in mind the well being of the environment and society making the machines and humans work together on a path of Green Future Industry 5.0 has the balance of both humans and technologies which benefits the ecosystem with discovery of new energy sources and renewable resources helping in a sustainable working environment It can be used to reduce harmful residue caused due to manufacturing processes and recycle rare materials Taking this theme the multidisciplinary congress on Industry 5.0 and Paradigm Shift Emerging Challenges will highlight research challenges and open issues that should be further developed to realize Industry 5.0

[of Images](#) Song-Chun Zhu,David Mumford,2007 A Stochastic Grammar of Images is the first book to provide a foundational

review and perspective of grammatical approaches to computer vision In its quest for a stochastic and context sensitive

grammar of images it is intended to serve as a unified frame work of representation learning and recognition for a large

number of object categories It starts out by addressing the historic trends in the area and overviewing the main concepts

such as the and or graph the parse graph the dictionary and goes on to learning issues semantic gaps between symbols and

pixels dataset for learning and algorithms The proposal grammar presented integrates three prominent representations in

the literature stochastic grammars for composition Markov or graphical models for contexts and sparse coding with

primitives wavelets It also combines the structure based and appearance based methods in the vision literature At the end of

the review three case studies are presented to illustrate the proposed grammar A Stochastic Grammar of Images is an

#### **Targeted Biomarker**

**Quantitation by LC-MS** Naidong Weng,Wenying Jian,2017-07-05 The first book to offer a blueprint for overcoming the

challenges to successfully quantifying biomarkers in living organisms The demand among scientists and clinicians for

targeted quantitation experiments has experienced explosive growth in recent years While there are a few books dedicated to

bioanalysis and biomarkers in general until now there were none devoted exclusively to addressing critical issues

surrounding this area of intense research Target Biomarker Quantitation by LC MS provides a detailed blueprint for

quantifying biomarkers in biological systems It uses numerous real world cases to exemplify key concepts all of which were

carefully selected and presented so as to allow the concepts they embody to be easily expanded to future applications

including new biomarker development Target Biomarker Quantitation by LC MS primarily focuses on the assay establishment

for biomarker quantitation a critical issue rarely treated in depth It offers comprehensive coverage of three core areas of

biomarker assay establishment the relationship between the measured biomarkers and their intended usage contemporary

regulatory requirements for biomarker assays a thorough understanding of which is essential to producing a successful and

defendable submission and the technical challenges of analyzing biomarkers produced inside a living organism or cell Covers

the theory of and applications for state of the art mass spectrometry and chromatography and their applications in biomarker

analysis Features real life examples illustrating the challenges involved in target biomarker quantitation and the innovative

approaches which have been used to overcome those challenges Addresses potential obstacles to obtain effective biomarker level and data interpretation such as specificity establishment and sample collection Outlines a tiered approach and fit for purpose assay protocol for target biomarker quantitation Highlights the current state of the biomarker regulatory environment and protocol standards Target Biomarker Quantitation by LC MS is a valuable resource for bioanalytical scientists drug metabolism and pharmacokinetics scientists clinical scientists analytical chemists and others for whom biomarker quantitation is an important tool of the trade It also functions as an excellent text for graduate courses in pharmaceutical biochemistry and chemistry
