*Campus Politics* Jonathan

Zimmerman,2016-08-08 Universities are usually considered bastions of the free exchange of ideas but a recent tide of demonstrations across college campuses has called this belief into question and with serious consequences Such a wave of protests hasn't been seen since the campus free speech demonstrations of the 1960s yet this time it is the political Left rather than the political Right calling for restrictions on campus speech and freedom And as Jonathan Zimmerman suggests recent campus controversies have pitted free speech against social justice ideals The language of trauma and more generally of psychology has come to dominate campus politics marking another important departure from prior eras This trend reflects an increased awareness of mental health in American society writ large But it has also tended to dampen exchange and discussion on our campuses where faculty and students self censor for fear of insulting or offending someone else Or they attack each other in periodic bursts of invective which run counter to the civility promised by new speech and conduct codes In Campus Politics What Everyone Needs to Know Jonathan Zimmerman breaks down the dynamics of what is actually driving this recent wave of discontent After setting recent events in the context of the last half century of free speech campus movements Zimmerman looks at the political beliefs of the US professorate and students He follows this with chapters on political correctness debates over the contested curriculum admissions faculty hires and affirmative action policing students academic freedom and censorship in loco parentis administration and the psychology behind demands for trigger warnings and safe spaces He concludes with the question of how to best balance the goals of social and racial justice with the commitment to free speech

**Grading the College** Scott M. Gelber,2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to

promote productive conversations about current attempts to define and measure the purposes of American higher education
