How to homeschool the kids you have: Advice from the kitchen table Courtney Ostaff, Jenn Naughton, Drew Campbell, 2022-12-09 In *How to Homeschool the Kids You Have* three veteran home educators lead you through the process of creating a custom educational plan that works for your family's unique situation and your children's needs. You'll identify your own educational priorities and learn how to translate them into a strong academic program. You'll also learn about what science tells us about how humans especially young humans learn and why that information is crucial for the success of your homeschooling plans. Along the way the authors share their own experiences and those of other homeschoolers to help you avoid pitfalls so you can provide your children with the excellent education that is their birthright. Free to Learn Lance T. Izumi, Xiaochin Claire Yan, 2005 Charters are by nature different not just from traditional public schools but from one another. With their freedom and flexibility some charter schools have opened doors and opportunities for many poor minority children who were previously trapped at failing campuses run by school district bureaucracies. These successful charter schools have perfected alternative models of organization management and discipline that shatter the status quo orthodoxy. In *Free to Learn* successful charter principals and teachers who often do things contrary to the public education establishment offer hope and practical advice for the charter movement. After Hurricane Katrina *Free to Learn* served as an inspiration and handbook for charter school administrators in New Orleans.
