**Education** Eilish McLoughlin, Odilla E. Finlayson, Sibel Erduran, Peter E. Childs, 2019-08-27 This edited volume presents innovative current research in the field of Science Education The chapters deal with a wide variety of topics and research approaches conducted in a range of contexts and settings Together they make a strong contribution to knowledge on science teaching and learning The book consists of selected presentations from the 12th European Science Education Research Association ESERA Conference held in Dublin Ireland from 21st to 25th August 2017 The ESERA community is made up of professionals with diverse disciplinary backgrounds from natural sciences to social sciences This diversity enables a rich understanding of cognitive and affective aspects of science teaching and learning The studies in this book will stimulate discussion and interest in finding new ways of implementing and researching science education for the future The twenty two chapters in this book are presented in four parts highlighting innovative approaches to school science emerging identities in science education approaches to developing learning and competence progressions and ways of enhancing science teacher education This collection of studies showcases current research orientations in science education and is of interest to science teachers teacher educators and science education researchers around the world with a commitment to bridging research and practice in science teaching and learning      *Nuclear Medicine Radiation Dosimetry* Brian J McParland, 2010-07-03

Complexities of the requirements for accurate radiation dosimetry evaluation in both diagnostic and therapeutic nuclear medicine including PET have grown over the past decade This is due primarily to four factors Growing consideration of accurate patient specific treatment planning for radionuclide therapy as a means of improving the therapeutic benefit development of more realistic anthropomorphic phantoms and their use in estimating radiation transport and dosimetry in patients Design and use of advanced Monte Carlo algorithms in calculating the above mentioned radiation transport and dosimetry which require the user to have a thorough understanding of the theoretical principles used in such algorithms their appropriateness and their limitations increasing regulatory scrutiny of the radiation dose burden borne by nuclear medicine patients in the clinic and in the development of new radiopharmaceuticals thus requiring more accurate and robust dosimetry evaluations An element common to all four factors is the need for precise radiation dosimetry in nuclear medicine which is fundamental to the therapeutic success of a patient undergoing radionuclide therapy and to the safety of the patients undergoing diagnostic nuclear medicine and PET procedures As the complexity of internal radiation dosimetry applied to diagnostic and therapeutic nuclear medicine increases this book will provide the theoretical foundations for enabling the practising nuclear medicine physicist to understand the dosimetry calculations being used and their limitations allowing the research nuclear medicine physicist to critically examine the internal radiation dosimetry algorithms available

and under development and providing the developers of Monte Carlo codes for the transport of radiation resulting from internal radioactive sources with the only comprehensive and definitive AngloSaxon(ist) Past, PostSaxon Futures Donna Beth Ellard, 2019 Over the past several years Anglo Saxon studies alongside the larger field of medieval studies has undergone a reckoning Outcries against the misogyny and sexism of prominent figures in the field have quickly turned to issues of racism prompting Anglo Saxonists to recognize an institutional structural whiteness that not only bars the door to people of color but also prohibits scholars from confronting the very idea that race and racism operate within the field's scholarship scholarly practices and intellectual history Anglo Saxonist Past, PostSaxon Futures traces the integral role that colonialism and racism play in Anglo Saxon studies by tracking the development of the Anglo Saxonist an overtly racialized term that describes a person whose affinities point towards white nationalism That scholars continue to call themselves Anglo Saxonists despite urgent calls to combat racism within the field suggests that this term is much more than just a professional appellation It is this book argues a ghost in the machine of Anglo Saxon studies a spectral figure created by a group of nineteenth century historians archaeologists and philologists responsible for not only framing the interdisciplinary field of Anglo Saxon studies but for also encoding ideologies of British colonialism and Anglo American racism within the field's methods and pedagogies Anglo Saxonist Past, PostSaxon Futures is at once a historiography of Anglo Saxon studies a mourning of its Anglo Saxonist fathers and an exorcism of the colonial racial ghosts that lurk within the field's scholarly methods and pedagogies Part intellectual history part grief work this book leverages the genres of literary criticism auto ethnography and creative nonfiction in order to confront Anglo Saxonist Past in order to imagine speculative PostSaxon Futures inclusive of voices and bodies heretofore excluded from the field of Anglo Saxon studies Nuclear Science Abstracts, 1976 *Grants and Awards for the Fiscal Year Ended ...* National Science Foundation (U.S.), 1964 *Spatialized Injustice in the Contemporary City* S. Nombuso Dlamini, Angela Stienen, 2022-05-12 This volume documents research illustrating public dissents and interventions to injustice in modern day cities Authors present everyday occurrences of city life and place making still they show how the ordinary city grows from historical dimensions of injustice violence and fear Yet ordinary citizens continue to make the city their own to contribute to the creation of city structures and to contest those practices of spatial demarcation which limit rather than uplift their everyday social livelihood Chapters show how marginalized populations from racial to gendered to the working poor are part of the apparatus that makes the city function However their contributions to city arrangement and endurance are perpetually at the margins and city spaces continue to be designed in ways that ignore and negate the existence of those who protest inequity Novel to the volume are chapters that document and illustrate contestations of city spaces through artistic representation Public spaces like schools art galleries and museums are presented as central to projects of inhabiting remembering and reimagining in the just city Still ordinary city spaces like the public washroom illustrate issues of gender inequity spatial bias and other art based protests City

dwellers interested in learning about the making of the city and those interested in the city as a space of possibilities and the good life will benefit from this volume Scholars of geography space art and social justice will marvel and simultaneously be appalled by the everyday minute yet shocking descriptions of the complexity and unfairly structured city spaces in which they dwell
