Hacking APIs Corey J. Ball, 2022-07-12 Hacking APIs is a crash course in web API security testing that will prepare you to penetration test APIs reap high rewards on bug bounty programs and make your own APIs more secure Hacking APIs is a crash course on web API security testing that will prepare you to penetration test APIs reap high rewards on bug bounty

programs and make your own APIs more secure You ll learn how REST and GraphQL APIs work in the wild and set up a streamlined API testing lab with Burp Suite and Postman Then you ll master tools useful for reconnaissance endpoint analysis and fuzzing such as Kiterunner and OWASP Amass Next you ll learn to perform common attacks like those targeting an API s authentication mechanisms and the injection vulnerabilities commonly found in web applications You ll also learn techniques for bypassing protections against these attacks In the book s nine guided labs which target intentionally vulnerable APIs you ll practice Enumerating APIs users and endpoints using fuzzing techniques Using Postman to discover an excessive data exposure vulnerability Performing a JSON Web Token attack against an API authentication process Combining multiple API attack techniques to perform a NoSQL injection Attacking a GraphQL API to uncover a broken object level authorization vulnerability By the end of the book you ll be prepared to uncover those high payout API bugs other hackers aren t finding and improve the security of applications on the web

Lange, Jean L. Minkel, 2024-12-30 Fully updated and expanded in its second edition Seating and Wheeled Mobility A Clinical Resource Guide presents clinical assessment considerations when working with a person with a mobility disability The book provides a wide spectrum of information from foundational information for those practitioners who are new to the field to in depth population specific information for practitioners who perhaps have not worked with a particular population in the past The book is divided into sections each section addressing a different area of clinical practice in wheelchair seating and mobility The first section is an in depth presentation of the assessment process and pressure management The range of available seating supports is presented as part of the product selection process including matching the person s needs with available technology The second section focuses on 24 hour postural care Three types of sitters are presented hands free hands dependent and prop sitters Included is the most current method to measure and describe the seated person and related support surfaces needed when recommending a device The third section lays the foundation for clinical decision making around the selection and fit of the most appropriate wheeled mobility device manual power wheelchair or scooter The fourth section provides in depth clinical applications for each mobility category On time mobility for the very young power seating and mobility skills training are addressed The fifth section provides population specific clinical application of position pressure management and mobility for the pediatric geriatric and bariatric populations as well as persons with both degenerative and complex neuromuscular impairments The sixth section presents additional considerations when working

with persons who are aging with a disability considerations of the environment of use safe transport of a wheelchair and the application of wheelchair standards in the clinic Finally measuring outcomes throughout the service provision process and a look at the past present and future of complex rehab technology is included Richly illustrated throughout this book has been carefully designed to support occupational and physical therapists suppliers distributors and funders payers who are interested in wheelchair seating and mobility assessment and applications New Dimensions in Photo Processes Laura Blacklow,2007-03-16 An ideal book for someone keen to experiment with old techniques Professional Photographer magazine
