

25. Daily: CHECKING FOR TIGHTNESS, REMEDIES

- Start the engine.
- Check tightness of lubrication, coolant, sea-water, fuel, air and exhaust systems.
- Tighten or change defective connections. Check tell-tale holes 1 which indicate if the O-ring between cylinder liners and crankcase are leaking, see figure.
 - a) If coolant is leaking, the two top O-rings are defective.
 - b) If lubrication oil is leaking, the bottom O-ring is leaking.
- Check that drain hole 2 in the coolant pump is not clogged, see figure. If coolant is leaking, change the pump seal.

A slight leakage during the running-in period is normal (seals and O-rings are lubricated with soap or oil when fitted). Such leakage disappears after a while.

If the leakage is major, consult the nearest Scania workshop.
