Manufacturing of Polymer Composites B. Tomas Astrom,2018-04-27 The potential application areas for polymer

composites are vast While techniques and methodologies for composites design are relatively well established the knowledge and understanding of post design issues lag far behind This leads to designs and eventually composites with disappointing properties and unnecessarily high cost thus impeding a wider industrial acceptance of polymer composites Manufacturing of Polymer Composites completely covers pre and post design issues While the book enables students to become fully comfortable with composites as a possible materials choice it also provides sufficient knowledge about manufacturing related issues to permit them to avoid common pitfalls and unmanufacturable designs The book is a fully comprehensive text covering all commercially significant materials and manufacturing techniques while at the same time discussing areas of research and development that are nearing commercial reality *Vehicles, Drivers, and Safety* John Hansen, Kazuya Takeda, Gerhard Schmidt, Huseyin Abut, 2020-05-05 This book presents works from world class experts from academia industry and national agencies representing countries from across the world focused on automotive fields for in vehicle signal processing and safety These include cutting edge studies on safety driver behavior infrastructure and human to vehicle interfaces Vehicle Systems Driver Modeling and Safety is appropriate for researchers engineers and professionals working in signal processing for vehicle systems next generation system design from driver assisted through fully autonomous vehicles

The Long Haul Pioneers Ashley Coghill, 2020-02-01 It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered In so doing they were solely responsible for creating the first long haul overland route across Europe and deep into the Middle East to Kabul The men had started the Middle East Run was to become a phenomenon in the road haulage industry an image which it still holds today This book is about the company founded by one of those men from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure These early long haul drivers would think nothing of a 10 000 mile round trip to Iran or the Arabian Gulf and being stranded at 6 000 feet on a mountain pass with temperatures below 40 was just all in a day s work Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images The end result is a detailed comprehensive and fascinating account of an extraordinary company *Fleet Owner* ,1992
