 Ogunniyi, 2017-09-12 Each volume in the 7 volume series The World of Science Education reviews research in a key region of  
 the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel  
 North Africa and the Middle East and Sub Saharan Africa The focus of this Handbook is on research in science education in  
 mostly former British colonies in Sub Saharan Africa and the scholarship that most closely support this program The reviews  
 of the research situate what has been accomplished within a given field in Sub Saharan Africa rather than an international  
 context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of  
 science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the  
 changing face of problems and solutions within regional contexts The approach allows readers to review what has been

 Comings, 2019-05-15 Learning to read and write for meaning and pleasure are arguably the two most important competences  
 that children acquire in primary school Yet in 2019 more than one half of children worldwide do not reach this first rung on  
 the literacy ladder Improving Early Literacy Outcomes aims to address this head on by foregrounding the work of more than  
 40 researchers most of them living in and working on developing countries Their contributions illuminate magnify and  
 discover anew the importance of improving early reading through precise alignment of curriculum teaching and assessment  
 and with a special focus on some of the most under studied countries in the world e g Burkina Faso Niger and Senegal  
 Through probing analyses of research policy and practice the book highlights the common experiences of high aspirations  
 repeatedly confronting harsh realities Sixteen interconnected chapters cast an ever vigilant and deflationary eye on the  
 temptation to take an unrealistic approach to early literacy and also caution against lumping all languages contexts and  
 policy challenges into a single heap This book provides an indispensable guide to policymakers practitioners educators and  
 academics working towards the realisation of the UN Sustainable Development Goals SDGs Improving the teaching learning  
 and assessment of early grade literacy is key not only to expanding the quality access and equity of education but also to  
 unlocking all the other SDGs and ultimately to driving development      *Becoming a Citizen Series* United States.
