Status of Teaching in North America Peter P. Grimmett, Jon C. Young, Claude Lessard, 2012-12-01 This book locates recent developments in teacher certification in North America within a broader international policy context characterized as hegemonic neo liberalism wherein economic rationalism has begun to trump professional judgment We focus on teacher certification because it addresses fundamental questions about who will teach what are the required minimum levels of competence and who will make those decisions Such questions are central to teaching constituting a new battleground for education in North America Two ideas economic rationalism and professionalization have become pivotal to education policy Economic rationalism finds its expression in a free market ideology Professionalization has two meanings professionalizing the practice of teaching constructing a professional knowledge base and professionalizing the status of teaching through links with universities and self regulation These ideas contestation varies by setting In the USA neo liberalism has attacked

professional knowledge questioning its scientific veracity Professionalization advocates claim that the neo liberalist aim is to undermine teaching as a profession In Canada neo liberalist critics are heard but have limited impact on policy Professionalization has emphasized teachers pedagogical development and a valuing of the field s input into teacher preparation Neo liberalist economic rationalism plays itself out overtly in the USA as de regulation in Canada it lies embedded within labor mobility agreements In the USA professionalization highlights professionalism in practice in Canada the governance of teaching This book explores how economic rationalism is using labor mobility agreements in Canada as a covert operation analogous to de regulation in the USA to assert its dominance in the battle to de professionalize teaching in North America

Inclusion in Urban Educational Environments Denise E. Armstrong, Brenda J. McMahon, 2006-06-01 This book is motivated by our experiences in working with students and their families in urban communities We are particularly concerned about the urgent imperative to address the endemic educational and societal challenges that pervade the lives of urban students particularly those who live in poverty are of minority and immigrant backgrounds and are otherwise marginalized within the current educational discourses and practices In spite of the fact that over the last 3 decades policy makers educators and communities across the globe have called for in depth structural changes this is rarely evidenced in the discourses practices and structures within academic and practitioner spheres This reluctance despite articulations to the contrary can be directly linked to normative theoretical and practical perspectives that are defined by assumptions that constrain urban students within restrictive boundaries These narrow outsider worldviews based on notions of what ought to be combined with ignorance of the realities of students lives focus on deviance and deficits They blind prospective change agents to the strengths and richness that students bring and they delimit the transformative potential of social justice praxis within urban environments The resulting discourse in the form of deficit beliefs thoughts actions and dialogues shapes urban research theory and practice We contend that in order to counteract the debilitating impacts of these harmful constructions of urban and social justice it is important to clarify this terminology

Collateral Damage Sharon L. Nichols, David C. Berliner, 2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell s Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against

high stakes testing while putting a compelling human face on the data marshalled in support of those arguments The Great Abdication Alexander Deane,2016-12-01 The middle class provides British society with its stability and strength According to Deane s contentious thesis our middle class has abstained from its responsibility to uphold societal values and the enormously damaging collapse of our society s norms and standards is largely a result of that abdication The institutions of political and social governance provide a husk of functionality and mask these problems for those that do not wish to see or do not care To restore Britain to something resembling a substantively functioning country the middle classes must reinstate themselves as arbiters of morality be unafraid to judge their fellow men and follow through with the condemnation that necessarily follows when individuals sin against common values No Child Left Behind Primer Frederick M. Report and Recommendation of the President to the Board of Directors on a Proposed Loan to the Democratic Socialist Republic of Sri Lanka for the Secondary Education Modernization Project Tadao Chino,2000 **New Directions in Assessing Historical Thinking** Kadriye Ercikan,Peter Seixas,2015-02-20 New technologies have radically transformed our relationship to information in general and to little bits of information in particular The assessment of history learning which for a century has valued those little bits as the

centerpiece of its practice now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex processes, historical thinking, historical consciousness or historical sense making demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have collectively moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments and methods of validation in both large scale and classroom assessments. *New Directions in Assessing Historical Thinking* is a critical research oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.

Bangladesh Hiranmay Karlekar, 2005. It is, I think, a timely and sobering reminder of the power of all kinds of fundamentalisms in the contemporary world and that no society is proof against their ravages, even those which have prided themselves on their secularism, tolerance and pluralism. Bangladesh is a country haunted by divisions, not only the Partition of India but also that of the War of Liberation and the even more fateful split between Muslim and Bengali, which is the more menacing because it exists within individuals within the people themselves. Whether the wholeness of a specifically Bengali version of Islam can be restored is the question which this book poses. Jeremy Seabrook, *The Guardian*. This book should ring a warning bell for policymakers in the South Block. If you do not agree, read Karlekar's chilling tale of the death of Mujibur's dream and that of many others who naively believed in it. Kanchan Gupta, *India Today*. The book unravels how the hate matrix has found a place in a culturally vibrant society that just two decades back asked for freedom from the shackles of an oppressive regime. Anju Kumar, *The Hindu*. Dubbed a hotbed of terrorism across the world, Bangladesh is under the spotlight. Hiranmay Karlekar's timely book tackles the issue with depth and insight. A must read for strategic thinkers and those involved in watching India's neighbourhood. *Tehelka*. The author argues that the headquarters of Islamic terrorism is shifting from Afghanistan to Bangladesh, which he describes as a soft state with an ineffective government and a weak police force. *The Pioneer*. Karlekar has a long experience of reporting on Bangladesh. His book resonates with this experience and with a wealth of details and will help fill the vacuum of information on Bangladesh and its crisis of fundamentalism. *The India Express*. Bangladesh focuses on the growth of Islamic fundamentalism in Bangladesh. Hiranmay Karlekar analyzes in detail the historical, social, cultural and political circumstances that have led to this and discusses the chances of the situation being altered. From a wealth of reliable sources, he discusses the circumstances which account for this rise in fundamentalism and he demonstrates the forces that function within the ruling coalition in Bangladesh, allowing this rise unchecked. Hiranmay Karlekar is Consultant Editor of *The Pioneer* and a member of the Press Council of India. During his career, he has been Editor of *The Hindustan Times*, Deputy Editor of *The*

Indian Express and Assistant Editor of The Statesman and the erstwhile Hindusthan Standard published from Kolkata by the Anandabazar Patrika group **Handbook of Research on Special Education Teacher Preparation** Paul T.

Sindelar, Erica D. McCray, Mary T. Brownell, Benjamin Lignugaris/Kraft, 2014-03-05 The purpose of this seven part handbook is to expand our knowledge of teacher education broadly by providing an in depth look at the most up to date research on special education teacher preparation *Gender Fairness in Today's School* Jim Dueck, 2017-09-15 This book traces back

how male students are currently disadvantaged in school by instruction in an overwhelmingly female environment devoid of male role models who can inspire the love of learning in male students Further teachers are unduly influenced by biases related to compliant behaviors which result in conflating assessments of student academic achievement with compliance Therefore males marks prevent to many from qualifying for courses leading to leading as well as achieving sufficiently high marks in those courses **The Politics of African-American Education** Kenneth J. Meier, Amanda Rutherford, 2016-08-24

The book provides a comprehensive assessment of current African American education policy and its politics
