YouTube Jonas Wolf,2024-09-03 YouTube features a wide array of multimodal musical figurations including fan made music

videos musical aestheticisations of pre circulating content and musical self performances Jonas Wolf explores open ended forms of musical creative relay on YouTube delving into formal imitative affective and non institutional aspects of networked media remix and self aestheticisation Beyond creating value for non musical fields of discourse this study is directed at filling a gap in a largely ocularcentric domain of study It provides a concise theory of vernacular composition within our time s total digital archive that accounts for socio aesthetic phenomena and their relation to systems of knowledge control and discourse

Crypto Sense: Investing Smarter in the Digital Wild West Harry South, Crypto Sense Investing Smarter in the Digital Wild West is your essential guide to navigating the high risk high reward world of cryptocurrency with clarity and confidence Whether you re crypto curious or knee deep in digital assets this book cuts through the noise with level headed insight practical tools and no nonsense advice From blockchain basics to smart portfolio strategies Crypto Sense shows you how to separate hype from opportunity and avoid the traps that catch even seasoned investors With a clear eyed look at market cycles scams and long term thinking it s a must read for anyone serious about making sense and profits in crypto The rules may be different out here But with Crypto Sense you ll learn how to play smart in the digital wild west *Best Loser Wins* Tom Hougaard,2022-08-16 *Best Loser Wins* is an intimate insight into one of the most prolific high stake retail traders in the world Tom Hougaard is the winner of multiple trading competitions and on one occasion traded 25 000 into more than 1 million over the course of a year While the average retail trader risks 10 per point in the underlying asset Tom Hougaard frequently risks up to 3 500 per point This risk exposure requires a mindset that is out of the ordinary Normal thinking leads to normal results For exceptional results traders must think differently This book will guide and inspire you in ways no other trading book has It is not about strategies and money management It is about mind management Tom Hougaard provides a unique and refreshingly personal account of how an ordinary trader elevated his game to incredible heights by focusing as much on his mental approach as on his technical analysis *Best Loser Wins* explains how you by thinking differently when you are trading can elevate your game from mediocre and sporadic to excellent and consistent No amount of technical analysis will ever do that for you Tom Hougaard says People don t fail because they don t know enough about technical analysis They fail because they don t understand what the markets are doing to their minds *Best Loser Wins* is an antidote to conventional and flawed thinking in trading and a blueprint for a new belief system for traders who want to elevate their results to levels they never dreamed they could reach **The Psychology of Trading** Balakrushna Swain,2025-08-11 *The Psychology of Trading* is a deeply practical and inspiring exploration into the inner game of trading where most battles are silently fought and won Written by a certified life coach and trading psychology mentor this book bridges the gap between technical skill and emotional intelligence Through relatable insights and grounded strategies it guides readers on a journey of mindset mastery emotional regulation and gradual transformation You ll discover how subconscious beliefs daily habits and emotional patterns silently influence your trades and how to shift them With frameworks drawn from NLP mindfulness and universal

principles like the 80 20 rule and 1% growth mindset this book is designed to help you trade smarter and live better Whether you re just beginning or looking to break through a plateau it offers not just tools but a new lens to see the markets and yourself This is not just about becoming a better trader It s about becoming a stronger more centred human being

Teaching Mathematics at a Technical College Zachary Youmans,2022-11-25 Not much has been written about technical colleges especially teaching mathematics at one Much had been written about community college mathematics This book addresses this disparity Mathematics is a beautiful subject worthy to be taught at the technical college level The author sheds light on technical colleges and their importance in the higher education system Technical colleges area more affordable for students and provide many career opportunities These careers are becoming or have become as lucrative as careers requiring a four year degree The interest in technical college education is likely to continue to grow Mathematics like all other classes is a subject that needs time energy and dedication to learn For an instructor it takes many years of hard work and dedication just to be able to teach the subject Students should not be expected to learn the mathematics overnight As instructors we need to be open honest and put forth our very best to our students so that they can see that they are able to succeed in whatever is placed in front of them This book hopes to encourage such an effort A notable percentage of students who are receiving associate degrees will go through at least one of more mathematics courses These students should not be forgotten about their needs are similar to any student who is required to take a mathematics course to earn a degree This book offers insight into teaching mathematics at a technical college It is also a source for students to turn toward when they are feeling dread in taking a mathematics course Mathematics instructors want to help students succeed If they put forth their best effort and us ours we can all work as one team to get the student through the course and onto chasing their dreams Though this book focuses on teaching mathematics some chapters expand to focus on teaching in general The overall hope is the reader will be inspired by the great work that is happening at technical colleges all around the country Technical college can be should be and is the backbone of the American working class

Transition and Coherence in Intellectual Property Law Niklas Bruun,Graeme B. Dinwoodie,Marianne Levin,Ansgar Ohly,2021-01-07 The nature and content of intellectual property IP law which is heavily contingent on the state of technology and on social and market developments has always been subject to ongoing transitions How those transitions are effected and the shape they take is crucial to the ability of IP to achieve its stated goals and provide the necessary climate for investment in creativity innovation and brand differentiation Yet the need for change can run headlong into a desire for coherence A search for coherence tests the limits of the concept of intellectual property is imperiled by overlaps between different IP regimes and calls for a unifying normative theme This volume assembles contributors from across IP and the globe to explore these questions including whether coherence is desirable It should be read by anyone interested in understanding the conceptual underpinnings of one of the most important and dynamic areas of the law
