*Discretization Methods and Structural Optimization — Procedures and Applications* Hans A. Eschenauer, Georg Thierauf, 2012-12-06 In recent years the Finite Element Methods FEM were more and more employed in development and design departments as very fast working tools in order to determine stresses deformations eigenfrequencies etc for all kinds of constructions under complex loading conditions Meanwhile very effective software systems have been developed by various research teams although some mathematical problems e g convergence have not been solved satisfactorily yet In order to make further advances and to find a common language between mathematicians and mechanicians the Society for Applied Mathematics and Mechanics GAMM agreed on the foundation of a special Committee Discretization Methods in Solid Mechanics focussing on the following problems Structuring of various methods displacement functions hybrid and mixed approaches etc Survey of approach functions Lagrange Hermite polynomials Spline functions Description of singularities Convergence and stability Practical and theoretical optimality to all mentioned issues single and interacting One of the basic aims of the GAMM Committee is the interdisciplinary cooperation between mechanicians mathematicians and users which shall be intensified Thus on September 22 1985 the committee decided to hold a seminar on Structural Optimization in order to allow an exchange of experiences and thoughts between the experts of finite element methods and those of structural optimization A GAMM seminar entitled Discretization Methods and Structural Optimization Procedures and Applications was held on October 5 7 1988 at the University of Siegen
