Stronge, Jennifer L. Hindman, 2006-02-15 We know that teachers make a profound difference in the lives of students and are the single most important school related influence on student achievement When it comes to teacher selection district and building level administrators are challenged to predict what kind of teacher a candidate will be based on information collected through an application and one or two interviews In this book James H Stronge and Jennifer L

Hindman explain how to take the guesswork out of hiring decisions Their Teacher Quality Index TQI is a structured research based interview protocol built on the quality indicators explored in Stronge s best selling Qualities of Effective Teachers Here educators with hiring responsibilities will find interview questions that reveal what they most need to know about teacher candidates and question specific descriptive rubrics that support consistent evaluation of candidates responses The Teacher Quality Index is the easiest most reliable way to see that new hires possess both the personal qualities essential to effective teachers and the requisite proficiencies in classroom management instructional planning and delivery and the monitoring of student progress and potential An accompanying CD ROM provides forms and scoring rubrics for both screening interviews and building based interviews The question sets are presented in multiple configurations variations for experienced and novice teachers as well as interviewer s choice formats which allow for additional customization Protocol guidelines succinct discussions of underlying research and response rating exercises ensure readers will come away with the rationale know how and tools to implement this teacher selection process and ultimately increase the overall effectiveness of their teaching staff

Note This product listing is for the Adobe Acrobat PDF version of the book **Connecting Abstract Algebra to Secondary**

Mathematics, for Secondary Mathematics Teachers Nicholas H. Wasserman, 2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for abstract algebra instructors interested in making connections to secondary mathematics

Literacy in Teacher Preparation and Practice Patrick M. Jenlink,2022-04-01 Today the meaning of literacy what it means to be literate has shifted dramatically Literacy involves more than a set of conventions to be learned either through print or technological formats Rather literacy enables people to negotiate meaning The past decade has witnessed increased attention on multiple literacies and modalities of learning associated with teacher preparation and practice Research recognizes both the increasing cultural and linguistic diversity in the new globalized society and the new variety of text forms from multiple communicative technologies There is also the need for new skills to operate successfully in the changing literate and increasingly diversified social environment Linguists anthropologists educators and social theorists no longer believe that literacy can be defined as a concrete list of skills that people merely manipulate and use Rather they argue that becoming literate is about what people do with literacy the values people place on various acts and their associated ideologies In other words literacy is more than linguistic it is political and social practice that limits or creates possibilities for who people become as literate beings Such understandings of literacy have informed and continue to inform our work with teachers who take a sociological or critical perspective toward literacy instruction Importantly as research indicates the disciplines pose specialized and unique literacy demands Disciplinary literacy refers to the idea that we should teach the specialized ways of reading understanding and thinking used in each academic discipline such as science mathematics engineering history or literature Each field has its own ways of using text to create and communicate meaning Accordingly as children advance through school literacy instruction should shift from general literacy strategies to the more specific or specialized ones from each discipline Teacher preparation programs emphasizing different disciplinary literacies acknowledge that old approaches to literacy are no longer sufficient *Literacy in Teacher Preparation and Practice* Enabling Individuals to Negotiate Meaning introduces the reader to a collection of thoughtful research based works by authors that represent current thinking about literacy across disciplines and the preparation of teachers to enter classrooms Each chapter focuses on teaching guided by literacies across disciplines and the preparation of teachers who will enter classrooms to instruct the next generation of students *Teaching Discipline-Specific Literacies in Grades 6-12* Vicky I. Zygouris-Coe,2014-10-30 Comprehensive timely and relevant this text offers an approach to discipline specific literacy instruction that is aligned with the Common Core State Standards and the needs of teachers students and secondary schools across the nation It is essential that teachers know how to provide instruction that both develops content and literacy

knowledge and skills and aims at reducing student achievement gaps Building on the research supported premise that discipline specific reading instruction is key to achieving these goals this text provides practical guidance and strategies for prospective and practicing content area teachers and other educators on how to prepare all students to succeed in college and the workforce Pedagogical features in each chapter engage readers in digging deeper and in applying the ideas and strategies presented in their own contexts Classroom Life real 6 12 classroom scenarios and interviews with content area teachers Common Core State Standards Connections College Career and Workforce Connections Applying Discipline Specific Literacies Think Like an Expert habits of thinking and learning specific to each discipline Digital Literacies Differentiating Instruction Reflect and Apply Questions Extending Learning Activities The Companion Website includes Lesson plan resources Annotated links to video files Annotated links to additional resources and information Glossary Flashcards For Instructors All images and figures used in the text provided in an easily downloadable format For Instructors PowerPoint lecture slides

A Handbook for Teacher Research Colin Lankshear, Michele Knobel, 2004-04-16 This informative book helped me to understand research in general and to bring focus and clarity to my current research project The text answers questions and provides guidance and support in a manner that is user friendly and easy to comprehend After reading this book I feel empowered as a teacher researcher and would unhesitatingly recommend it to other teacher researchers graduate students and educators Francesca Crowther teacher and doctoral student Nova Scotia Canada This book provides a comprehensive and detailed approach to teacher research as systematic methodical and informed practice It identifies five requirements for all kinds of research and provides clear and accessible guidelines for teachers to use in conducting their own classroom based studies Features A clear definition of teacher research which insists on more than stories and anecdotal retrospectives Innovative organisational structure based on the collection and analysis of spoken written and observed data with strong emphasis on the design of research projects Easy to use and widely applicable tools and techniques for collecting and analysing data in qualitative research Informed by the authors own wide ranging experiences A Handbook of Teacher Research provides everything the teacher researcher needs in order to conduct good quality practitioner research It is ideal for upper level undergraduate Education programmes and for postgraduate research as well as for teacher researchers who conceive and drive their own independent studies

Contemporary Perspectives Through Action Research Across Educational Disciplines Nancy T. Nasr, Jill Alexa Perry, 2023-03-01 The mission of the Action Research Across Educational Disciplines series is to present targeted volumes of action research findings from a wide variety of educational settings Specifically this series aims to

highlight the issues that commonly impact practitioners counselors administrators and other stakeholders in education The rationale for such a series comes from the continually evolving educational landscape resulting from changing student demographics and societal needs To face the contemporary issues that surface as a result of this changing educational landscape educators must prepare for and lead through the change with an intent on overcoming these issues through improvements to their daily practice As many educators are left without tools or resources to make a stronger impact in their educational contexts this series will serve as a mentor text that provides examples of studies undertaken by practitioners using action research to improve their practice As a result Action Research Across Educational Disciplines will present the tools and findings associated with action research to educators across the broad field of K 12 education and beyond wishing to improve and transform their practice This first volume of the Action Research Across Educational Disciplines series presents action research findings from a wide variety of K 12 disciplinary settings In doing so the first volume of this series aims to highlight the issues that commonly impact practitioners in K 12 STEM English Social Science and even Art classrooms and illustrate the solutions proposed in these contexts to improve both educator practice and student achievement Through the use of action research methodologies to address such issues volume one of this series offers a resource for improving educational practice across diverse K 12 contexts

Children Crossing Borders Joseph Tobin, Jennifer Keys Adair, Angela Arzubiaga, 2013-10-31 In many school districts in America the majority of students in preschools are children of recent immigrants For both immigrant families and educators the changing composition of preschool classes presents new and sometimes divisive questions about educational instruction cultural norms and academic priorities Drawing from an innovative study of preschools across the nation Children Crossing Borders provides the first systematic comparison of the beliefs and perspectives of immigrant parents and the preschool teachers to whom they entrust their children Children Crossing Borders presents valuable evidence from the U S portion of a landmark five country study on the intersection of early education and immigration The volume shows that immigrant parents and early childhood educators often have differing notions of what should happen in preschool Most immigrant parents want preschool teachers to teach English prepare their children academically and help them adjust to life in the United States Many said it was unrealistic to expect a preschool to play a major role in helping children retain their cultural and religious values The authors examine the different ways that language and cultural differences prevent immigrant parents and school administrations from working together to achieve educational goals For their part many early education teachers who work with immigrant children find themselves caught between two core beliefs on one hand the desire to be culturally sensitive and responsive to parents and on the other hand adhering to their core professional codes of best practice While immigrant parents generally prefer traditional methods of academic instruction many teachers use play based curricula that give children opportunities to be creative and construct their own knowledge Worryingly most preschool teachers say they have received little to no training

in working with immigrant children who are still learning English For most young children of recent immigrants preschools are the first and most profound context in which they confront the conflicts between their home culture and the United States Policymakers and educators however are still struggling with how best to serve these children and their parents Children Crossing Borders provides valuable research on these questions and on the ways schools can effectively and sensitively incorporate new immigrants into the social fabric

Innovations in Teaching and Learning: International Approaches in Developing Teacher Education and Curriculum for The Future Marco Ferreira, Lawrence Meda, Markus Talvio, 2024-04-16 During the last few years teachers across cultures have faced a lot of unprecedented demands in developing their methods in instruction Population mobility unstable labour market and globalisation change society around us rapidly In addition education per se is constantly changing and redefining and modifying learning and teaching environments are an ongoing process For example modern educational psychology including positive psychology movements emphasizing collaborative knowledge creation calls teachers to facilitate their students learning and wellbeing and to create a positive learning environment instead of using traditional frontal teaching and other teacher centered methods Digital revolution has challenged teachers to adapt new educational settings and to update their pedagogical approaches into more use of digital solutions Indeed the COVID 19 pandemic propelled the teachers to offer new optimal learning experiences
