Association Visual Culture Studies Section 2023 Extractivism has increasingly become the ground on which activists and
scholars in Latin America frame the dynamics of ecological devastation accumulation of wealth and erosion of rights These
maladies are the direct consequences of long standing extraction oriented economies and more recently from the expansion
of the extractive frontier and the implementation of new technologies in the extraction of fossil fuels mining and agriculture
But the fields of sociology political ecology anthropology and geography have largely ignored the role of art and cultural
practices in studies of extractivism and post extractivism The field of art theory on the other hand has offered a number of
texts that put forward insightful analyses of artwork addressing extraction environmental devastation and the climate crisis
However an art theory perspective that does not engage firsthand and in depth with collective action remains limited and
fails to provide an account of the role processes and politics of art in anti and post extractivist movements Creating Worlds
Otherwise examines the narratives that subaltern groups generate around extractivism and how they develop communicate
and mobilize these narratives through art and cultural practices It reports on a six year project on creative resistance to
extractivism in Argentina and builds on long term engagement working on environmental justice projects and campaigns in
Argentina and the UK It is an innovative contribution to the fields of Latin American studies political ecology cultural studies
and art theory and addresses pressing questions regarding what post extractivist worlds might look like as well as how such
