**The Mathematics Teacher** ,1917 **Siam's New Detectives** Samson Lim,2016-02-29 Visual evidence is the sine qua non of the modern criminal process from photographs and video to fingerprints and maps Siam s New Detectives offers an analytical history of these visual tools as employed by the Thai police when investigating crime Covering the period between the late nineteenth century and the end of the Cold War the book provides both an extended overview of the development and evolution of modern police practices in Thailand and a window into the role of the Thai police within a larger cultural system of knowledge production about crime violence and history Based on a diverse set of primary sources police reports detective training manuals trial records newspaper stories memoirs archival documents and hard to find crime fiction the book makes two related arguments First the factuality of the visual evidence used in the criminal justice system stems as much from formal conventions proper lighting in a crime scene photo

standardized markings on maps as from the reality of what is being represented Second some images once created function as tools helping the police produce truths about the criminal past This generative power makes images such as crime scene maps useful as investigative aids but also means that scholars cannot analyze them simply in terms of mimetic accuracy or interpret them in isolation for deeper meaning Understanding how modern legal systems operate requires an examination of the visual culture of the law particularly the aesthetic rules that govern the generation and use of documentary evidence By examining modern policing in terms of visual culture Siam s New Detectives makes important methodological contributions The book shows how a historical analysis of form can supplement the way many scholars have traditionally approached visual sources as symbols requiring a close reading By acknowledging the productive nature of images in addition to their symbolic functions the book makes clear that policing is fundamentally an interactive creative endeavor as much as a disciplinary one
