Navigating Teacher Education in Complex and Uncertain Times Carmen I. Mercado, 2019-04-04 Carmen I Mercado draws on four decades of seminal research and theory on how American children who come from homes where languages other than English are spoken learn to read and to write in school to reveal aspects of locally responsive planning and adaptations that should be central to any teacher education program that hopes to serve its unique local population base responsibly Mercado uses a range of theoretical lenses particularly those surrounding critical theory the approach designed to deconstruct power relationships in society to capture and explain the complexities of the teaching learning process making visible institutional social and political influences clear She explores an extensive collection of tools and resources for teaching to explore how educators can inform their thinking and shape their own practices to broaden access to people and resources and to influence classroom instruction as school populations becomes increasingly diverse on a global scale through immigration Mercado also shows how self study has been a key aspect of her program's evolution suggesting that teacher education should be informed by teacher educators own investigations into their own programs and processes that each teacher educator ought to be an active reinventor of her own program based on reflection on current data Mercado sensitively draws together the technical and emotional dimensions of learning to teach acknowledging that critical theory can bring up deep often uncomfortable feelings of anger guilt resentment and other responses to unfair conditions However since schools are designed as places of opportunity facing these responses is essential at a time with the feelings of antagonism that characterize the present day world and its conflictual social groups Mercado offers the opportunity to address these

Language Matters Timothy Reagan, 2009-04-01 This book addresses a timely and very important topic language in education Language apparently is a very tricky business On the one hand everyone uses language and virtually everyone has strong views about language In the educational domain this seems to be especially true Language is not merely an intrinsic component of the educational process as the medium of instruction in the classroom but also serves as the mediator of social reality for students and teachers alike It plays a central role in articulating and conveying not only social

cultural and empirical ideas but ideological concepts as well. It is also used to make judgments about the speaker not to mention its role in maintaining differential power relations. And yet in spite of this the role of language is not sufficiently recognized in classroom practice much of the time. Nor is language except in fairly narrow ways really an especially central part of the curriculum in spite of its incredible importance. To be sure we do spend a great deal of time and money attempting to teach students to read and write that is to provide them with basic literacy skills and we provide nominal support for foreign language education programs. We also provide limited support for children coming to school who do not speak English. What we do not do though is to recognize the absolute centrality of language knowledge and language use for the educated person. This book seeks to address these issues from the broad perspective of critical pedagogy.
