Responding to the Educational Needs of Post-school Youth Nico Cloete,2009 The research reflected in this volume indicates that in South Africa there are almost three million youth between the ages of 18 and 24 who are not in education training or employment a situation which points not only to a grave wastage of talent but also to the possibility of serious social disruption The authors in this work paint a picture of the enormous reservoir of human talent which exists in the country but is not provided with the means to develop Responding to the Educational Needs of Post School Youth attempts not only to sketch the scope and extent of the current post school educational crisis but also to explore possible solutions through collaboration in the higher education sector The findings reported here are a result of three distinctive but

linked research components conducted by the Further Education and Training Institute University of Western Cape the Centre for Higher Education Transformation and the Southern Africa Labour and Development Research Unit University of Cape Town The research was funded by the Ford Foundation and the project conducted in consultation with the Department of Education First Call Shirley Robinson, Linda Biersteker, 1997 The Children's Budget is not a separate budget for children Rather it is an attempt to examine what resources government is allocating to programmes that benefit children and whether these programmes adequately reflect the needs of children The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-08-24 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations All over the world economic inclusion has risen to the top of the development discourse A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education Using the vivid example of South Africa a country that had ambitious goals at the outset of its transition from apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning

Education in a New South Africa Robert J. Balfour, 2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education International Education Reform and Language Education Global Practices in Inclusive Education Curriculum and Policy Sepadi, Medwin Dikwanyane, Makweya, Phineas Phuti, 2024-10-31 Education is not just a matter of policy it's a fundamental human right Today inclusive education stands as a paramount goal Educators aim to provide equitable learning opportunities for all students addressing varying needs and fostering supportive school cultures irrespective of their backgrounds or abilities However despite widespread recognition of its importance inclusive education curricula and policies face numerous challenges Educators and policymakers grapple with problems such as insufficient resources lack of support for teachers and complications with adapting the curriculum to the diverse needs of students Global Practices in Inclusive Education Curriculum and Policy explores successful practices from around the world This book addressed the multifaceted aspects of inclusive education Through its exploration of topics such as curriculum differentiation assistive technologies and policy implementation strategies the book equips academics and policymakers with actionable insights and strategies to foster truly inclusive learning environments Life History Research, 2009-01-01 Much has been written about life history research in

recent times It has been paraded as a counterculture to the traditional research canon and celebrated as a genre that promotes methodological pluralism However lifehistory researchers have an obligation to transcend spurious claims about the perceived merits of the methodology and extend the debates around how the genre simultaneously problematises and responds to the competing challenges of Epistemology Methodology and Representation In conceiving of each of the chapters from an epistemological perspective the authors focus on how their individual work has crossed or expanded traditional borders of epistemology and ontology of how the work has satisfied the rigours of thesis production and contributed to changing conceptions of knowledge what knowledge gets produced and how knowledge is produced when we make particular methodological choices Since any methodological orientation is invariably selective and the researcher is always involved and implicated in the production of data the authors focus on what selections they have made in their projects what governed these choices what benefits deficits those choices yielded and what the implications of their research are for those meta narratives that have established the regimes of truth legitimacy and veracity in research Knowledge production is inextricably linked to representation In the process of articulating their findings each author made particular representational choices sometimes transgressing conventional approaches The book explores why these choices were made and how the choices influenced the kinds of knowledge generated The book provides theoretical justifications for these transgressions and reflect on how the experience of representation helped disrupt the authors essentialist notions of research production and for whom it is produced This book is not another celebration of lifehistory as a counterculture The book hopes to be a deeply critical contribution to disrupt notions around epistemological authority voice and power and how these are mediated by the delicate relations of the researcher and researched The problematises and complicates the assumptions that frame this genre with a view to highlighting the potential hazards of the method while demonstrating its potentiality in shaping our conceptions of Ethics Methodology and Representation
