Dahlquist, Charles D. Kirkpatrick II, 2010-11-03 This Element is an excerpt from Technical Analysis The Complete Resource for Financial Market Technicians Second Edition 9780137059447 by Charles D Kirkpatrick and Julie Dahlquist Available in print and digital formats Do price cycles come in waves An objective look at the evidence and what it means to investors Trends don't occur in a straight line Prices oscillate up and down around a trend These oscillations form trading ranges patterns and channels Could these oscillations have some sort of regularity Believing they do cycle analysts look at prices as a form of complex harmonics or waves Not surprisingly the concept of prices oscillating in cycles is controversial

Geometrical Analysis: Innovative Way of Chart Analysis Anand Bapurao Kene, 2019-02-14 Technical analysis is considered as statistical analysis by most of analysts thus totally ignoring the geometrical aspect of graph which in fact rules or supersedes the statistical analysis. Statistical tools merely average out the old price time data and project the same in future. Thus very old price and time data will not have effect on future time and price which in fact is not true in our universe. Most of the technical analysis is done nowadays with the help of software on computers. Chart or Graph viewing is customized or projected to the user to please his viewing angle and comfort. But while doing so we are completely forgetting ignoring the basic chart characteristics. Geometrical Aspect is ignored since they can not be applied on currently available graphs on computers. If the scaling of the graph is not proper we won't be able to use geometrical overlays to determine the future price and time balancing points as well as geometrical pressure points. Mitotic scaling is the answer to this. This scaling is a bridge joining charts with the geometrical overlays completely solving the issue and creating platform for analyzing the chart through geometrical perspective. This book is all about Geometrical application in the field of chart analysis. Nature is geometry hence its existence in every living and non living object is inevitable. So when we think of a one of the product of human brain whatever it may be it should contain basic geometry else its very own existence is questionable. I sincerely tried to explore my path in geometrical world of stock market. I have enjoyed lot of intellectual joy throughout this period. Enjoying the truth of our very own existence is like journey backward to millions and billions of years. I thank this nature who allowed me to think in this direction and open new world for exploration to the coming generation.
