Technical Indicators With Formula , Technical indicators can inform you about different aspects of the market such as trend volatility momentum market strength cycle and so on

They are mathematical calculations that can be applied to a stock's price volume or even to another technical indicator

The result is a value that is used to anticipate future changes in prices

Indicators serve three broad functions to alert to confirm and to predict

When choosing an indicator to use for analysis try to choose indicators that complement each other instead of those that generate the same signals such as Stochastics and RSI which are good for showing overbought and oversold levels

For analyzing trends use trend following indicators like moving averages

For trading ranges use oscillators like RSI

There are 42 technical indicators in this ebook with brief description and mathematical formula of each

Finding potential stocks are easy using these indicators especially if you have charting software which allows you to create your own filters

As always in technical analysis learning how to read indicators is more of an art than a science
