Jomo,Rajah Rasiah,2013-02-01 This book and its companion Technology Competitiveness and the State examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development The focus is on the development of Malaysia's technological industrial base from a sector and firm specific perspective including the role of foreign multinationals in this

process Industrial Technology Development in Malaysia provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies Technology Application in Aviation, Tourism and Hospitality Azizul Hassan,Nor Aida Abdul Rahman,2022-10-22 This book covers multiple areas such as technology and the type of application in aviation tourism and hospitality with looking at current and future technology application as well as in a rural tourism perspective The strength of this book comes from the authors themselves coming from multiple higher institutions in Malaysia and Indonesia as these two countries are the top two countries in Southeast Asia with the world s most popular tourist destinations and for a reason a tropical climate rich culture gorgeous beaches wonderful food and low prices This book is also packed with detailed knowledge in the area of air travel as well as deep understanding on the related theories used as theoretical underpin in performing air travel research This book provides insightful discussion and very beneficial to the reader This book is suitable for the following readers general students travelers academics tourism consultants aviation regulators aviation practitioners and ministries of tourism Readers are also exposed to recent issues and development pertaining technology application in aviation tourism and hospitality theoretical discussion related to technology application as well as its application and future research application *Proceedings of the 2nd International Conference on Innovation and Technology in Sports, ICITS 2023, 27-28 November, Malaysia* Zulkifli Mohamed,Mohd Zamani Ngali,Suhizaz Sudin,Mohamad Fauzi Ibrahim,Alexander Casson,2024-07-20 This book compiles the proceedings of ICITS 2023 that comprehensively includes diverse technological facets within the realm of Sports Engineering and Technology The book encompasses various specialized tracks including instrumentation materials data analytics biomechanics simulation equipment design and performance analysis among others A deeper understanding of the pivotal challenges encountered and technological breakthroughs achieved in the pursuit of enhancing sporting performance is deliberated The readers are expected to gain insights into prevailing trends pertinent issues ameliorative factors cutting edge technological innovations and proposed remedies thereby further enriching their knowledge of this multidisciplinary field Technology Acceptance in Education Timothy Teo,2011-10-26 Technology acceptance can be defined as a user s willingness to employ technology for the tasks it is designed to support Over the years acceptance researchers have become more interested in understanding the factors influencing the adoption of technologies in various settings From the literature much research has been done to understand technology acceptance in the business contexts This is understandable given the close relationship between the appropriate uses of technology and profit margin In most of the acceptance studies researchers have sought to identify and understand the forces that shape users acceptance so as to influence the design and implementation process in ways to avoid or minimize resistance or rejection when users interact with technology Traditionally it has been observed that developers and procurers of technological resources could rely on authority to ensure that technology was used which is true in many

industrial and organizational contexts However with the increasing demands for educational applications of information technology and changing working practices there is a need to re-examine user acceptance issues as they emerge within and outside of the contexts in which technology was implemented This is true in the education milieu where teachers exercise the autonomy to decide on what and how technology will be used for teaching and learning purposes Although they are guided by national and local policies to use technology in the classrooms teachers spent much of their planning time to consider how technology could be harnessed for effective lesson delivery and assessment to be conducted These circumstances have provided the impetus for researchers to study technology acceptance in educational settings Although these studies have typically involved students and teachers as participants their findings have far-reaching implications for school leaders policy makers and other stakeholders The book is a critical and specialized source that describes recent research on technology acceptance in education represented by educators and researchers from around the world such as Australia Belgium China Hong Kong Malaysia Singapore United Kingdom and United States of America
