Adams,2015-07-01 This book examines the intersection and interplay between Progressive Era rhetoric regarding commercialized vice and the realities of prostitution in early twentieth century Philadelphia Arguing that any study of commercial sexual vice in a historical context is difficult given the paucity of evidence this work instead focuses on reformers construction of a cultural view of prostitution which Adams argues was based more upon their perceptions of the trade than on reality itself Looking at the urban core of the city Progressive reformers saw vice immorality and decay but as they frequently had little face to face interaction with prostitutes plying their trade they were forced to construct culturally fueled archetypes to explain what they believed they saw Ultimately reformers in Philadelphia were battling against a rhetorical creation of their own design and any study of anti vice reform in the early twentieth century tells us more about the relationship between activists and the government than it does about vice itself **The Future of the Jews** Stuart Eizenstat,2014-07-02 In *The Future of the Jews* Stuart E Eizenstat a senior diplomat of international reputation surveys the major geopolitical economic and security challenges facing the world in general and the Jewish world and the United States in particular These forces include the shift of power and influence from the United States

Russia in World History Choi Chatterjee, 2022-01-27 Russia in World History uses a comparative framework to understand Russian history in a global context The book challenges the idea of Russia as an outlier of European civilization by examining select themes in modern Russian history alongside cases drawn from the British Empire Choi Chatterjee analyzes the concepts of nation and empire selfhood and subjectivity socialism and capitalism and revolution and the world order in the 19th 20th and 21st centuries In doing so she rethinks many historical narratives that bluntly posit a liberal West against a repressive authoritarian Russia Instead Chatterjee argues for a wider perspective which reveals that imperial practices relating to the appropriation of human and natural

resources were shared across European empires both East and West Incorporating the stories of famous thinkers such as Leo Tolstoy Emma Goldman Wangari Maathai Arundhati Roy among others This unique interpretation of modern Russia is knitted together from the varied lives and experiences of those individuals who challenged the status quo and promoted a different way of thinking This is a ground breaking book with big and provocative ideas about the history of the modern world and will be vital reading for students of both modern Russian and world history Bradford County Marcella M. The Oxford History of Classical Reception in English Literature OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This first volume and fourth to appear in the series covers the years c 800 1558 and surveys the reception and transformation of classical literary culture in England from the Anglo Saxon period up to the Henrician era Chapters on the classics in the medieval curriculum the trivium and quadrivium medieval libraries and medieval mythography provide context for medieval reception The reception of specific classical authors and traditions is represented in chapters on Virgil Ovid Lucan Statius the matter of Troy Boethius moral philosophy historiography biblical epics English learning in the twelfth century and the role of antiquity in medieval alliterative poetry The medieval section includes coverage of Chaucer Gower and Lydgate while the part of the volume dedicated to the later period explores early English humanism humanist education and libraries in the Henrician era and includes chapters that focus on the classicism of Skelton Douglas Wyatt and Surrey **Hope in Times of Crisis** Marina Ngursangzeli Behera,Michael Biehl,Risto

Jukko,Kenneth R. Ross,2025-06-06 The early twenty first century has dashed hopes for a more peaceful harmonious and prosperous world order as many societies have been plunged into conflict and living conditions for many have become ever more precarious The crisis is compounded by the advance of damaging climate change that jeopardizes the future of life on earth Where can the imagination be found to meet such an unprecedented crisis This book mines one hundred years of

ecumenical reflection on mission affirming the strengths of this tradition It does so in a spirit of metanoia repentance recognizing that churches and missions were often complicit in trends that have proved to be damaging At the same time it draws on elements of renewal in thinking about mission cherishing of life environmental responsibility action for justice deepening of spirituality working from a basis in ecumenical Christianity to make common cause with people of all faiths and convictions who share similar concerns While the book is unflinching in confronting the injustice and destructiveness of the prevailing world order its final message is one of hope proposing that a retrieval and renewal of the ecumenical vision holds the promise of a brighter future C. Conrad,2016-01-12 The first comprehensive overview of the innovative new discipline of global history Until very recently historians have looked at the past with the tools of the nineteenth century But globalization has fundamentally altered our ways of knowing and it is no longer possible to study nations in isolation or to understand world history as emanating from the West This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history one that takes the connectedness of the world as its point of departure and that poses a fundamental challenge to the premises and methods of history as we know it What Is Global History provides a comprehensive overview of this exciting new approach to history The book addresses some of the biggest questions the discipline will face in the twenty first century How does global history differ from other interpretations of world history How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrisms How can historians compare different societies and establish compatibility across space What are the politics of global history This in depth and accessible book also explores the limits of the new paradigm and even its dangers the question of whom global history should be written for and much more Written by a leading expert in the field What Is Global History shows how by understanding the world s past as an integrated whole historians can remap the terrain of their discipline for our globalized present [America: Pttt Gde to Essentials 2000 Third Edition](#) Andrew Robert Lee Cayton,Prentice Hall Directories Staff,Elisabeth Israels Perry,Linda Reed,Allan M.
