## World War 2

World War 2, also known as the Second World War, was a global conflict that lasted from 1939 to 1945. It involved many countries and had a significant impact on the world. This reading comprehension text will explore some key aspects of World War 2.

The war began on September 1, 1939, when Germany, under the leadership of Adolf Hitler, invaded Poland. This act prompted Britain and France to declare war on Germany. Over the next six years, the war spread to many parts of the world, with major battles fought in regions such as Europe, Asia, Africa, and the Pacific. One of the main causes of World War 2 was the Treaty of Versailles, which had been imposed on Germany after World War 1. This treaty placed the blame for the war solely on Germany and imposed heavy reparations. It also led to the rise of Hitler and the Nazi Party, who sought to restore Germany's power and prestige.

The war involved the use of many new weapons and technologies. Airplanes played a significant role, with both sides conducting air raids and engaging in dogfights. The German Luftwaffe, led by the skilled pilot Hermann Göring, conducted the devastating Blitz on British cities, in an attempt to break the morale of the British people. However, the British Royal Air Force, with their brave pilots and radar technology, successfully defended their country in the famous Battle of Britain. Another crucial aspect of World War 2 was the Holocaust.

This was the organized genocide of around six million Jews and millions of other people, including Roma, disabled individuals, and political dissidents. The Nazi regime systematically implemented this horrific plan, using concentration camps and mass extermination methods such as gas chambers. The Holocaust remains one of the darkest chapters in human history.

*Film Style and the World War II Combat Genre* Stuart Bender,2014-08-11 Film Style and the World War II Combat Genre is a detailed examination of the stylistic means by which filmmakers depict stories of combat The work furthers contemporary discussions by analyzing a range of World War II combat films to a degree of detail which has previously escaped critical attention This substantial examination of cinematography sound editing and acting in a range of movies including Saving Private Ryan Windtalkers Bataan and Objective Burma demonstrates the importance of close attention to the textual construction of these films specifically as well as cinematic texts more generally The work advances the original analytic descriptions of controlled spontaneity and reported realism as theoretical concepts which explain why viewers regard certain stylistic techniques as realistic This notion of realism is then further understood through reference to a body of research in cognitive psychology to argue that the density of audio visual information in contemporary combat films is a significant factor in creating a sense of realism
