Teaching World History: A Resource Book Heidi Roupp,2015-03-04 A resource book for teachers of world history at all levels The text contains individual sections on art gender religion philosophy literature trade and technology Lesson plans reading and multi media recommendations and suggestions for classroom activities are also provided The New Politics of the Textbook Heather Hickman,Brad J. Porfilio,2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and dis ability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and

political dominance over knowledge production **The Trouble with Textbooks** Gary A. Tobin, Dennis R. Ybarra, 2008-01-01 Our elementary middle and high school teaching about Jews Judaism and Israel is driven by textbook misstatements about Jewish theology social structure and the history of Israel that comprise an unsavory picture of Jews and Israel This book will be an extremely valuable reference tool for educators and members of the public interested in religion and the Middle East Teaching Global History Alan J. Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it **Social Studies Curriculum, The, Fourth Edition** E. Wayne Ross, 2014-11-01 This fully revised and updated edition includes twelve new chapters on contemporary topics such as ecological democracy Native studies inquiry teaching and Islamophobia The Social Studies Curriculum Fourth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies The book connects the diverse elements of the social studies curriculum civic global social issues offering a unique and critical perspective that separates it from other texts Completely updated this book includes twelve new chapters on the history of the social studies democratic social studies citizenship education anarchist inspired transformative social studies patriotism ecological democracy Native studies inquiry teaching Islamophobia capitalism and class struggle gender sex sexuality and youth experiences in school and critical media literacy All the chapters from the previous edition have been thoroughly revised and updated including those on teaching social studies in the age of curriculum standardization and high stakes testing critical multicultural social studies prejudice and racism assessment and teaching democracy Readers are encouraged to reconsider their assumptions and understanding about the origins purposes nature and possibilities of the social studies curriculum **World History**, 2003 *Social Studies for Secondary Schools* Alan J. Singer, 2008-10-26 This popular text advocates an inquiry and activity based view of social studies teaching that respects the points of view of students and teachers Based in practice and experience it offers systematic support and open honest advice for new teachers is conversational not pedantic and provides lots of examples While the structure and most of the topics remain largely the same as before this Third Edition

presents new lesson ideas in every chapter especially designed to help new teachers to address learning standards to work in inclusive settings and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project or activity based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre service social studies methods courses this text is also useful for in service training programs as a reference for new social studies teachers and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice Whitewashing War

Christopher Leahey, 2015-04-24 Whitewashing War explores perhaps the most critical issue social studies educators presently face How do we teach our students about war In this timely book Christopher Leahey investigates how the political struggles over the social studies curriculum the corporate domination of the textbook and testing industry and the curricular constraints of the No Child Left Behind Act combine to stifle historical inquiry and deprive students of meaningful social studies instruction Using the controversial Vietnam War as a case study Leahey holds textbook narratives up to the light illuminating how the adoption process interpretive framework and selection of evidence combine to transform the past into thinly veiled historical myths By attending to questions traditionally ignored in history education this dynamic book Challenges educators to rethink their pedagogical approaches to military conflict American and otherwise Calls on teachers to develop students critical sensibilities to ask questions conduct research evaluate evidence and make meaning of the past Provides classroom lessons for history educators and students to engage in rich intellectual encounters with the historical record Christopher R Leahey teaches world history in upstate New York His articles have appeared in Social Education and The Social Studies If students are to be prepared for the challenges of the 21st century then we need to provide inspired interdisciplinary instruction that can provide the skills values and knowledge to enable our future citizens with the possibility promise and perspective to transform their world Whitewashing War provides that solid interdisciplinary framework for teachers and students to teach and learn about the myth of war Critical Education Leahey echoes a concern expressed by others that history textbooks fail to address the realities of war CHOICE The crowning achievement of Whitewashing War is that it clearly illustrates the necessity of pursuing rational answers about why things are as they are or were as they were It becomes clear upon reading this book that if we help our students pursue rational answers in the course of creating personally meaningful understandings of the world they will figure out just what it is that needs to be done From the Foreword by E Wayne Ross University of British Columbia The author has done a masterful job of exploring issues of historiography pedagogy textbook debates and critical thinking Through a deep examination of two historical turning points in the Vietnam War he has contrasted the known facts of these periods with the accounts contained in the textbooks Rick Ayers Graduate School of Education UC Berkeley A passionate and powerful analysis Christopher Leahey provides

penetrating insight into how Americans teach about their wars As such his book is an invaluable aid to understanding the past and its connection to our current predicament Fredrik Logevall Cornell University *Whitewashing War* challenges the fundamental assumptions underlying the corporate regime of standards textbooks and testing and exposes the distortions manipulation and lies that result Leahey builds a compelling case for critical inquiry and dialogue Highly recommended Ronald W Evans San Diego State University author of *The Social Studies Wars* *The Patchwork of World History in Texas High Schools* Stephen Jackson,2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States *World History : Patterns of Interaction* Roger B. Beck,Linda Black,Larry S. Krieger,1999 TofC cont Perspectives on the present Restructuring the postwar world Colonies become new nations Struggles for democracy Global interdependence Glossary *World History - Patterns of Interaction* Holt McDougal,2001 **Modern World History** Roger B. Beck,Linda Black,Larry S. Krieger,Phillip C. Naylor,Dahia Ibo Shabaka,2006-02-09 **Teaching Information Literacy Skills to Social Sciences Students and Practitioners** Douglas Cook,Natasha Cooper,2006 Teaching Information Literacy to Social Sciences Students Practitioners is a second discipline based casebook from ACRL This volume is based on the ACRL Information Literacy Competency Standards and presents cases on learning situations and how they can be analyzed and addressed Also included are descriptions of instruction sessions for each case notes and teaching resources Each case explicitly reflects one or more of the ACRL Information Literacy Standards This practical collection of cases and applications brings a new set of resources to librarians doing instruction in the social sciences Contributors cover such topics as data literacy visual literacy and developmental research skills training Information on teaching undergraduate graduate and international students and how to incorporate information literacy into various social science curricula are also presented **World History** ,2005

Marking the "Invisible" Andrea M. Hawkman, Sarah B. Shear, 2020-04-01 Substantial research has been put forth calling for the field of social studies education to engage in work dealing with the influence of race and racism within education and society Branch 2003 Chandler 2015 Chandler Husband 2010 King Ladson Billings 2003 Ooka Pang Rivera Ladson Billings 2003 Woyshner Bohan 2012 In order to challenge the presence of racism within social studies research must attend to the control that whiteness and white supremacy maintain within the field This edited volume builds from these previous works to take on whiteness and white supremacy directly in social studies education In Marking the Invisible editors assemble original contributions from scholars working to expose whiteness and disrupt white supremacy in the field of social studies education We argue for an articulation of whiteness within the field of social studies education in pursuit of directly challenging its influences on teaching learning and research Across 27 chapters authors call out the strategies deployed by white supremacy and acknowledge the depths by which it is used to control manipulate confine and define identities communities citizenships and historical narratives This edited volume promotes the reshaping of social studies education to support the histories experiences and lives of Students and Teachers of Color challenge settler colonialism and color evasiveness develop racial literacy and promote justice oriented teaching and learning Praise for Marking the Invisible As the theorization of race and racism continues to gain traction in social studies education this volume offers a much needed foundational grounding for the field From the foreword to the epilogue Marking the Invisible foregrounds conversations of whiteness in notions of supremacy dominance and rage The chapters offer an opportunity for social studies educators to position critical theories of race such as critical race theory intersectionality and settler colonialism at the forefront of critical examinations of whiteness Any social studies educator researcher concerned with the theorization or teaching of race should engage with this text in their work Christopher L Busey University of Florida
