 astonishing people who had done amazing things some of whom she had heard of but most of whom she had not And then she

began to paint their pictures and write down their stories The result is a jaw dropping feat of historic and artistic research The wide variety of lives occupations time periods and achievements is absolutely mind bending From Joan of Arc to Josephine Baker from Hippolyta to Greta Thunberg from Anne Frank to Misty Copeland these women made and changed history But there are just as many whom you ve never heard of who were never recognized in their lifetimes whose achievements need to be brought to light They include the anti Nazi activist Sophie Scholl who was executed at age twenty one by the Third Reich and Alice Ball a young African American scientist who discovered a treatment for leprosy but died tragically before she could receive credit for it This is not only a breathtaking art book Original Sisters also recounts a secret history that must be told so that it is a secret no more **Software, Infrastructure, Labor** Ned Rossiter, 2016-06-23

Infrastructure makes worlds Software coordinates labor Logistics governs movement These pillars of contemporary capitalism correspond with the materiality of digital communication systems on a planetary scale Ned Rossiter theorizes the force of logistical media to discern how subjectivity and labor economy and society are tied to the logistical imaginary of seamless interoperability Contingency haunts logistical power Technologies of capture are prone to infrastructural breakdown sabotage and failure Strategies of evasion anonymity and disruption unsettle regimes of calculation and containment We live in a computational age where media again disappear into the background as infrastructure Software Infrastructure Labor intercuts transdisciplinary theoretical reflection with empirical encounters ranging from the Cold War legacy of cybernetics shipping ports in China and Greece the territoriality of data centers video game design and scrap metal economies in the e waste industry Rossiter argues that infrastructural ruins serve as resources for the collective design of blueprints and prototypes demanded of radical politics today
