The Naked Neuron Rhawn Joseph, 2013-12-01 In the beginning there was not only life but the ability to communicate and eventually to cooperate among the most basic primeval creatures In The Naked Neuron Dr Joseph an internationally respected neuroscientist and author of the highly praised The Right Brain and the Unconscious Discovering the Stranger Within takes us on an intriguing journey through time as he traces the evolution of communication and language from the most primitive single celled animals to our earliest ancestors to humans today As he so clearly demonstrates we are linked to all levels of animals in a common bond of

sensing feeling and communication Be it singing wolves dancing bees or writhing rock and roll dancers all communicate a treasure chest of meaning in the absence of the spoken word Approximately 700 million years ago a unique type of cell came into being the neuron This naked neuron or nerve cell lacked a protective fatty sheath Still it marked a monumental and world altering development since it would become the building block of the brain The naked neuron generated a revolutionary change resulting in a greater complexity and subtlety of thought Dr Joseph vividly depicts how neurons conferred on early humans advanced powers of mental and sensory acuity including the gift of remembering one s past and contemplating the future Although humans possess much of the same ancient brain tissue as our fellow primates Dr Joseph reveals to us the singular features of the human brain that have enabled humans uniquely to develop complex spoken language He holds us spellbound revealing that although the new and old brain tissue are couched within the same brain each often has difficulty understanding the impulses and language of the other This ground breaking book draws on Dr Joseph s brilliant and original research and theories fusing the latest discoveries made in neuroscience sociobiology and anthropology He illuminates how the languages of the body and brain enhance intuitive understanding and spur a thirst for knowledge for its own sake The human body and brain together are a veritable living museum which contains billions of cells with a long evolutionary history As this unforgettable book shows it is the communication of this panoply of cells the residues of the past merged with the musings of the present that gives rise to life love art science literature and the ceaseless desire to search for and acquire knowledge
