CONTINENTAL SERVICE DATA No. 19/CSD

## RENAULT CARAVELLE & FLORIDE SPECIALE

Manufacturers: Regie Renault, Billancourt, France.

U.K. Head Office: Renault Ltd., Western Avenue, Acton, London, W.3.

All rights reserved. This Service Data Sheet is compiled by the technical staff of Motor Trader, from information made available by the vehicle manufacturers and from our own experience. It is the copyright of this journal, and may not be reproduced, in whole or in part, without permission. While care is taken to ensure accuracy we do not accept responsibility for errors or omissions.

THESE models are designated R.1131 and R.1133, and the R.1133 Caravelle was first introduced to the U.K. market in the early part of 1964. The R.1131, fitted with a 956cc five-main bearing engine appeared in the previous year, but latest type cars are fitted with the 1100cc engine, data for which appears in these pages. As is customary with most Renault models, there is a wide range of ancillary equipment fitted as standard, which is usually classified as "optional extra."

Vehicles are identified in the accustomed Renault manner, by serial and chassis numbers. The chassis serials are to be found stamped on a diamond shaped plate, and the vehicle serials make up the manufacturing number, which is stamped on an oval plate. Both of these plates are located on and secured to the dash panel and are visible when the front luggage boot is opened. Both serial numbers should be quoted when referring to the U.K. Head Office, or when ordering spare parts, or when corresponding with Renault drivers.

Engines are also serial numbered, and these numbers are to be found stamped on a rectangular plate which is located on the cylinder block, on the right-hand side and towards the rear of the unit. As with other Renault cars, the layout is such that the engine, with combined gearbox and differential unit, are mounted at the rear of the car, power being transmitted forwards through the differential gear to the rear road wheels.

Front suspension is independent, effected through coil springs and unequal length wishbones of pressed steel, with an anti-roll bar connected between the lower wishbones. At the rear, suspension is also independent, by coil springs and swing axle. Each half-axle tube pivots on needle rollers at its inner (gear-box) end. Longitudinal tie rods are fitted between each half axle and body floor pressing.

Major unit removal, brief notes: engine, clutch and gearbox and differential unit may be removed together as a unit, or the engine and clutch may be removed separately as can the gearbox and differential.

Brakes are Lockheed hydraulic disc units on all four wheels, with single piece calliper units and a pressure limiting device incorporated in the rear wheel circuit line.

Service policy of the manufacturers and the U.K. representation is that all matters of service, spares and warranty work are carried out by Renault distributors and dealers who are equipped and staffed to perform this work, and who carry the requisite range of spare parts.

Threads and hexagons are Metric throughout the vehicle.
